- (1) JLG Model CM2033 drivable scissor lift - 750lb capacity

Only qualified personnel possessing valid proof of training will be permitted to operate lifts.

Facility

Loading Docks

There are two loading docks located at the rear of the building. Each door is 94 1/2"x 106" and is equipped with a hydraulic leveller. The loading dock doors are approximately 50 ft in a straight line to the main stage. Loading dock levellers will only facilitate trucks with a minimum deck height of 36".

Parking

Clients renting the main stage are entitled to two parking passes for temporary parking at River Run Centre (including any production vehicles). Additional parking can be found in parkades directly across the street, or at meters in front of the Centre.

River Run Centre

Dressing Rooms and Green Room

- (3) Large dressing rooms – includes makeup positions; costume racks
- (3) Small dressing rooms – includes makeup positions; washroom; shower

The Green Room is equipped with comfortable furniture, sink, microwave, mini fridge, and phone capable of making internal and local calls.

Please note that when both performance spaces are in use that the main stage uses (2) large and (2) small dressing rooms and the Green Room is a shared space.

Washrooms

There are accessible women's and men's washrooms with shower facilities located in the dressing room hallway. There is an additional accessible washroom located behind the backstage desk.

Wardrobe Room

This room is equipped with a light duty industrial washer and dryer. There is also an ironing board, iron, and steamer provided. Visiting companies are asked to provide their own laundry detergent and other supplies.

Carpentry Shop

The shop is well equipped and available for the repair/build of small items only. Please note that a qualified River Run Technician must be present when the shop is in use.

Cable Pass Through

River Run Centre has many cable pass' and raceways throughout the building. Contact the Supervisor of Technical Services for a complete plan.

Electrics

Available Touring Power

Loading Dock	120/208 3 phase 200A disconnect
Stage Right	120/208 3 phase 400A disconnect
Stage Left	120/208 3 phase 200A disconnect
Canada Company Hall	120/208 3 phase 200A disconnect
Stage Right Operating Gallery	(2) 120/208 3 phase 400A disconnect

All panels except the ones located on the stage right operating gallery are fitted with E1016 series CAM-LOK connectors with ground and neutral connections reversed.

The panels located on the stage right operating gallery require an electrical tie in.

Please note that any electrical equipment that is brought to River Run Centre must have an accepted certification mark recognized in the Province of Ontario.

Before access to the above panels is permitted a wiring notification (permit) must be obtained through the Electrical Safety Authority of Ontario. Please contact the Supervisor of Technical Services for more information.

River Run Centre

House Lighting Plot

River Run Centre is equipped with an extensive house lighting plot. Please contact the Supervisor of Technical Services for copies.
