

## COMPENDIUM OF RESOURCES

This is a collection of resources related to the sharing economy. The list was gathered as part of research for “Navigating the sharing economy: A six-decision guide for municipalities.” The list includes case studies of many less well known forms of sharing, as well as resources on community based / mission driven models of sharing (e.g., platform co-operatives). There are also articles dealing with the different debates about the sharing economy, including articles that critique some forms of sharing.

**Please note:** this not an exhaustive list – there are opinions, points of view and cases not represented here. All links were correct at time of use (August 2017).
