### **Election of Heritage Guelph Chair**

---

## **Business Items**

### **55 Delhi Street – Confirmation of cultural heritage value and heritage attributes for recommended intention to designate**

Delegation: Robert Eilers (Vesterra Property Management)

#### Staff Recommendation:

That Heritage Guelph recommends that Council publish its intention to designate 55 Delhi Street pursuant to Section 29, Part IV the Ontario Heritage Act; and

That the original portion of the building at 55 Delhi Street has cultural heritage value or interest in that it has:

- design or physical value as a representative example of a major institutional building designed with architectural elements of early 20<sup>th</sup> century Edwardian Classicism. The building displays a high degree of craftsmanship and architectural design and demonstrates the work of two architects that are significant in southern Ontario and the local community (Stewart McPhee and William Mahoney respectively).
- direct historical or associative value in its contribution to the development of the Guelph General Hospital as an important institution in the city.

- contextual value as it is important in defining, maintaining or supporting the historical character of the Delhi Street streetscape and is functionally and historically linked to its surroundings as an important extant element of the historic Guelph General Hospital campus; and

That the following are to be considered as heritage attributes to be protected by a heritage designation by-law for 55 Delhi Street:

- all four elevations of the original Georgian Revival building form (2.5-storey plus basement) constructed with pressed red brick with blue headers in a Flemish bond pattern in un-tinted mortar and rock-faced limestone basement exterior walls
- main side gable roof with return eaves, two projecting pedimented frontispieces, three pedimented front dormers, four pedimented rear dormers and pedimented rear wall dormer beside brick chimney stack
- all original exterior wood trim including modillions under eaves and verges
- all original window and exterior door locations, openings and tooled stone lug window sills
- projecting front entrance porch, balcony and paired Tuscan columns
- rusticated quoins formed by recessed brick courses at corners and plinth
- front entrance door and door case with sidelights, fanlight and basket arch in red brick with projecting denticulated head band
- 2-storey oriole windows in both side gable walls
- original wooden railing elements of the centre stairway from basement to third floor including the handrail, balustrade, turned balusters and newel posts with fountain motif
