As of 2022/02/28, no phase two environmental site assessment is required by the regulation for the record of site condition property and based on the phase one environmental site assessment for the record site condition property, in my opinion, it is not necessary for any other reason to conduct a phase two environmental site assessment for the record of site condition property.

As of 2022/02/28, in my opinion, based on the phase one environmental site assessment, there is no evidence of any contaminants in the soil, ground water or sediment on, in or under the record of site condition property that, if the record of site condition property were put to any of the types of property uses listed in subsection 1 (2) of the regulation, are likely to interfere with any of those types of property uses.
