

## Environmental Noise

**The report does not include the Guelph Noise Control Guidelines (GNCG) as a governing document)**

*The Guelph Noise Control Guidelines have been referenced and utilized in the updated Noise Report*

**The report did not include Janefield Ave (a collector road) as a traffic noise source, whereas the GNCG stipulates that noise studies are required, in part, when development of noise sensitive land use is adjacent to a collector road**

*Janefield Avenue has been added as a noise source and the results are included in the updated Noise Report.*

**Table 1 of the report uses an incorrect road noise level criteria of 65 dBA for OLAs**

*Table 1 has been updated with the correct criteria (now Table 2-1).*

**Section 7 of the report should reference the GNCG to determine appropriate warning clauses and wording thereof**

*Warning Clause 'C' from the CNCG has been utilized.*
