Legal Notification

This report was prepared by EXP Services Inc. for the account of **M. Flaman Productions Ltd.**. Any use which a third party makes of this report, or any reliance on or decisions to be made based on it, are the responsibility of such third parties. EXP Services Inc. accepts no responsibility for damages, if any, suffered by any third party as a result of decisions made or actions based on this Project.

Executive Summary

This executive summary is a brief synopsis of the report and should not be read in lieu of reading the report in its entirety.

EXP Services Inc. (EXP) was retained by M. Flaman Productions Ltd. (the "Client") to conduct a Phase One Environmental Site Assessment (ESA) of the property located at 68-76 Wyndham Street South, Guelph, Ontario (hereinafter referred to as the "Site" or "Phase One Property"). The Site is currently zoned for residential property use. It is EXP's understanding that the Site is proposed to be developed as a apartment building and may require the filing of a Record of Site Condition (RSC) on the Ontario Ministry of the Environment, Conservation and Parks (MECP's) Brownfields Environmental Site Registry in accordance with Ontario Regulation 153/04, as amended (O. Reg. 153/04). Thus, in accordance with the requirements of O. Reg. 153/04, a Phase One ESA was conducted to evaluate the current Site conditions to support an RSC filing.

The Site is an "L"-shaped property that is 0.13 hectares (0.32 acres) property located on the east side of Wyndham Street South (formerly Crawford Street) in Guelph, Ontario.

Note: In the vicinity of the Site, Wyndham Street South runs in a northwest/southeast direction. For the ease of reporting, Wyndham Street South will be referred to as running in a north/south direction and surrounding properties and physiographic features will be oriented as such.

The Site is located in an area of mixed residential, institutional and commercial land use. The nearest waterbody is the Speed River which meanders throughout the Phase One Study Area and is located approximately 85 m north, 120 m west and 190 m south of the Site. The Site is currently developed with a slab-on-grade, wood framed commercial building (former car sales and rental business), and single-family residential building with basement level with approximate footprints of 75 m^2 (830 ft^2) and 65 m^2 (685 ft^2), respectively. There is a wood framed detached garage located in the southeast corner of the Site. Refer to the Site Location Plan, Figure 1a, and the Site and Surrounding Land Use Plan, Figure 1b.

EXP could not confirm the exact date of the first development of the Site. However, based on a review of available information (chain of title search and available online historical archives), the parcel of land which included the Site was first patented by the Crown in approximately 1832. The first recorded deed was issued to Samuel Crawford. To date, the Site, at least in part, has been owned by independent persons with the exception of Guelph Carpet Mills Company (also known as Guelph Carpet and Worsted Spinning Mills Ltd. and Guelph Yarns Ltd.) between 1902 and 1949. However, the fire insurance plans (FIPs) reviewed did not provide coverage of the Site, indicating that the Site was not developed at the time the Site was owned by Guelph Carpet Mills Company. According to aerial photographs, the Site is occupied by an inferred residential dwelling on the south side of the Site and an inferred commercial building on the central portion of the Site from 1964 to 2018. According to the review of city directories, the Site was occupied by car rental sale and sale operations between 1976 and 2006 as well as residential between approximately 1955 and 2011. A previous Phase I ESA conducted by Trow Associates Inc. (the former identify of EXP) indicated that the Site was occupied by a Tastee Freeze (1969-1970) and Jack's Pizza (1970-1980). The north

portion of the Site is currently rented out for parking and the residence on the south side of the Site has been converted into separate units for student rental housing.

The Phase One Study Area consists of properties located within 250 m of the Site boundaries. The Phase One Study area encompasses lands in the City of Guelph generally extending east from Gordon Road to Neeve Street and south from Surrey Street West extending to the green space located on the south side of the Eramosa River. Land uses within the Phase One Study Area are a mixture of commercial, residential and light industrial development. Roads, including names, within the Phase One Study Area are identified on Figure 1b.

Current observations, records and historical information pertaining to the Site and previous assessments were evaluated in relation to on-and off-Site PCAs. Three on-Site PCAs were identified during this Phase One ESA and are shown on Figure 3A, including:

- 28. Gasoline and associated products in fixed tanks (Furnace Oil AST)
- 30. Importation of Fill Material of Unknown Quality
- 52. Storage, maintenance, fueling and repair of equipment, vehicles and material used to maintain transportation systems (Storage of vehicles for rental and sale purposes only)

Four (4) off-Site PCAs were identified in the Phase One Study Area. The off-Site PCAs are shown on Figure 3A and include:

- 28. Gasoline and associated products in fixed tanks (71 Wyndham Street South)
- 34. Metal Fabrication (67 Wyndham Street South)
- 37. Operation of dry-cleaning equipment (77 Wyndham Street South)
- 52. Storage, maintenance, fueling and repair of equipment, vehicles and material used to maintain transportation systems (71-75 Wyndham Street South)
- 54. Textile manufacturing (Guelph Carpet and Worsted Spinning Mills, east of Neeve Street between the Speed River and Howitt Street and Canadian Textile & Weaving Co. Limited, east side of Wyndham Street South, south of Speed River (formerly 30-33 Crawford Street now 67 Wyndham Street South))

Off-site PCAs distanced enough from the Site and/or cross-gradient in relation to the inferred groundwater flow direction to the north/northwest. Thus, off-Site PCAs are not considered to have contributed to an APEC.

APEC	Location of APEC	Potentially Contaminating Activity (PCA)	Location of PCA (on- or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted
APEC 1	Entire Site	30. Importation of fill material of unknown quality	On-Site	PAHs O. Reg. 153 Metals & Inorganics	Soil
APEC 2	Northern Portion of Site	52. Storage, maintenance, fuelling and repair of equipment, vehicles and material used to maintain transportation systems 54. Textile manufacturing and processing	On and Off-Site	PHCs VOCs	Soil and Groundwater
APEC 3	Eastern Portion of Site	28. Gasoline and associated products in fixed tanks 34. Metal fabrication 37. Operation of dry cleaning equipment 52. Storage, maintenance, fuelling and repair of equipment, vehicles and material used to maintain transportation systems	Off-Site	PHCs VOCs	Soil and Groundwater
APEC 4	Southeast Corner	28. Gasoline and associated products in fixed tanks	On-Site	PHCs	Soil and Groundwater

Based on the Phase One ESA findings, PCAs both on- and off-Site were identified, which may have contributed to an APEC at the Site. EXP recommends that a Phase Two ESA (which includes soil and groundwater sampling) be conducted at the Site.

1. Introduction

EXP Services Inc. (EXP) was retained by M. Flaman Productions Ltd. (the "Client") to conduct a Phase One Environmental Site Assessment (ESA) of the property located at 68-76 Wyndham Street South, Guelph, Ontario (hereinafter referred to as the "Site" or "Phase One Property"). The Site is currently zoned for residential property use (zoning R.1B-10 classification). It is EXP's understanding that the Site is proposed to be developed as a small apartment building and may require the filing of a Record of Site Condition (RSC) on the Ontario Ministry of the Environment, Conservation and Parks' (MECP's) Brownfields Environmental Site Registry in accordance with Ontario Regulation 153/04, as amended (O. Reg. 153/04). Thus, in accordance with the requirements of O. Reg. 153/04, a Phase One ESA was conducted to evaluate the current Site conditions to support an RSC filing.

A Phase One ESA is a systematic qualitative process to assess the environmental conditions of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with the requirements as prescribed under O. Reg. 153/04 and in accordance with generally accepted professional practices. Subject to this standard of care, EXP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in Appendix A.

1.1 Phase One Property Information

The Site is an "L"-shaped property that is 0.13 hectares (0.32 acres) property located on the east side of Wyndham Street South (formerly Crawford Street) in Guelph, Ontario.

Note: In the vicinity of the Site, Wyndham Street South runs in a northwest/southeast direction. For the ease of reporting, Wyndham Street South will be referred to as running in a north/south direction and surrounding properties and physiographic features will be oriented as such.

The Site is located in an area of mixed residential, institutional and commercial land use. The nearest waterbody is the Speed River which meanders throughout the Phase One Study Area and is located approximately 85 m north, 120 m west and 190 m south of the Site. The Site is currently developed with a slab-on-grade, wood framed commercial building (former car sales and rental business), and single-family residential building with basement level with approximate footprints of 75 m^2 (830 ft^2) and 65 m^2 (685 ft^2), respectively. There is a wood framed detached garage located in the southeast corner of the Site. Refer to the Site Location Plan, Figure 1a, and the Site and Surrounding Land Use Plan, Figure 1b.

The legal description of the Site is: Part of Lots 7 and 8, Registered Plan 306, City of Guelph, County of Wellington. A copy of a legal survey highlighting the boundaries of the Phase One Property is provided in Appendix B.

The Site property identification number (PIN) is 71339-0069 and assessment roll # 010002111000000 (68 Wyndham Street South) and #010002112000000 (76 Wyndham Street South).

The approximate Universal Transverse Mercator (UTM) coordinates of the Site centroid are 4821289N and 561276E (NAD83 17). The UTM coordinates were based on measurements obtained from Google Earth

geographic information system website. The accuracy of the Site centroid is estimated to range from 5 to 10 m.

The current Site owner is M. Flaman Productions Ltd.

The owner contact information is as follows:

Company Address:	M. Flaman Productions Ltd. 76 Wyndham Street South Guelph, Ontario N1E 5R4
Contact Name:	Mr. Michael Flaman
Contact Telephone:	(519) 277-1479

2. Scope of Investigation

The scope of work for the Phase One ESA consisted of the following activities:

- Review of the historical occupancy of the Site from information presented in available archived and relevant municipal and business directories, fire insurance plans (FIPs), topographical maps, and aerial photographs;
- Contacting municipal and provincial agencies to determine the existence of records of environmental regulatory non-compliance, if any, and reviewing such records where available;
- Review of available geologic maps, well records and utility maps pertaining to the Site and local area;
- Review of chain of title and assessment rolls information previously reported for the Site;
- Obtain and review an Ecolog ERIS Report prepared for the Site;
- Conducting a reconnaissance of the Site to identify the presence of actual and/or potential environmental contaminants or concerns of significance;
- Conducting interviews with designated Site representative(s) as a resource for current and historical Site information, as well as to provide EXP staff with unrestricted access to all areas of the Site and Site buildings;
- Review of the current use of the Site and any land use practices that may have impacted its environmental condition;
- Review of the current use of the surrounding properties and any land use practices within the Phase One Study Area that may have impacted the environmental condition of the Site; and,
- Preparing a report to document the findings.

In completing the scope of work, EXP did not conduct any intrusive investigations, including sampling, analyses, or monitoring. EXP has confirmed neither the completeness nor the accuracy of any of the records that were obtained or of any of the statements made by others.

EXP personnel who conducted assessment work for this project included Laura Barrett, B.Sc., C. Tech., Chris Friedmann, C.E.T. and Scott Aziz, P.Eng., QP_{ESA}. An outline of their qualifications is provided in Appendix C.

3. Records Review

3.1 General

3.1.1 Phase One ESA Study Area Determination

The Site is located on the east side of Wyndham Street South in Guelph, Ontario, as shown on Figure 1a. The Site is currently zoned for residential property use (R.1B-10).

The Phase One Study Area consists of properties located within 250 m of the Site boundaries. The Phase One Study area encompasses lands in the City of Guelph generally extending east from Gordon Road to Neeve Street and south from Surrey Street West extending to the green space located on the south side of the Eramosa River. Land uses within the Phase One Study Area are a mixture of commercial, residential and light industrial development. Roads, including names, within the Phase One Study Area are identified on Figure 1b.

The identified land uses in the Phase One ESA study area are shown in Figure 2.

3.1.2 First Developed Use Determination

EXP could not confirm the exact date of the first development of the Site. However, based on a review of available information (chain of title search and available online historical archives), the parcel of land which included the Site was first patented by the Crown in approximately 1832. The first recorded deed was issued to Samuel Crawford. To date, the Site, at least in part, has been owned by independent persons with the exception of Guelph Carpet Mills Company (also known as Guelph Carpet and Worsted Spinning Mills Ltd. and Guelph Yarns Ltd.) between 1902 and 1949. However, the fire insurance plans (FIPs) reviewed did not provide coverage of the Site, indicating that the Site was not developed at the time the Site was owned by Guelph Carpet Mills Company. According to aerial photographs, the Site is occupied by an inferred residential dwelling on the south side of the Site and an inferred commercial building on the central portion of the Site from 1964 to 2018. According to the review of city directories, the Site was occupied by car rental sale and sale operations between 1976 and 2006 as well as residential between approximately 1955 and 2011. A previous Phase I ESA conducted by Trow Associates Inc. (the former identify of EXP) indicated that the Site was occupied by a Tastee Freeze (1969-1970) and Jack's Pizza (1970-1980). The north portion of the Site is currently rented out for parking and the residence on the south side of the Site has been converted into separate units for student rental housing.

3.1.3 Fire Insurance Plans

A search of the *Catalogue of Canadian Fire Insurance Plans 1875 – 1975* was completed by EXP in order to obtained historical information on the Site and surrounding areas. FIPs dated 1922 (Revised 1929), 1922 (Revised 1946) and 1960 were available for the Phase One Study Area. None of the FIPs available provided coverage of the east side of Wyndham Street South (formerly Crawford Street) indicating that the area was likely undeveloped at the time of the FIP.

1922-Revised 1929 FIP (Poor Quality Microfiche)

Distance/ Direction	Property	Occupant(s)	Description
30 NW	30- 33 Crawford Street (Now 67 Wyndham Street South)	Canadian Textile & Weaving Co. Limited	Textile factory with Office, separate weaving building, and coal shed. Heat is by coal fired boiler. Dye house located at the west side of the factory.
130 m NE	West of Neeve Street, South of River. Bound by Neeve, Howitt and Margaret Streets	Guelph Carpet Worsted Spinning Mills Limited	Building has concrete floor and wood and glass roof. Heat is by coal fired boiler with chimney. Coal shed located on southwest side of property. Areas of the facility include sizing/winding, weaving, printing, starch room and shipping/warehouse/ storage. Railway spurs located south and west of factory building.

1922-Revised 1946 FIP (Poor Quality Microfiche)

Distance/ Direction	Property	Occupant(s)	Description
30 m NW	30 Crawford Street (Now 67 Wyndham Street South)	Furrows Textiles	Wood and brick buildings with boiler. Labelling is illegible.
130 m NE	West of Neeve Street, South of River. Bound by Neeve, Howitt and Margaret Streets	Guelph Carpet Worsted Spinning Mills Limited	Building has concrete floor and wood and glass roof. Heat is by coal fired boiler with chimney. Coal shed located on southwest side of property. Areas of the facility include sizing/winding, weaving, printing and shipping/warehouse/storage.

1960 FIP

Distance/ Direction	Property	Occupant(s)	Description
30 m NW	67 Wyndham Street South	Manning Moto Car Ltd	Automotive Supply & Repairs. Wood and brick buildings with boiler. No tanks.
25 m W	75 Wyndham Street South	The Wyndham Building	Various offices, lighting manufacturer. Concrete and brick building.
215 m NW	24 Wellington Street East	Guelph Motor Products Ltd.	Garage, Show Room & Offices. Two (2) underground fuel storage tanks shown.
200 m N	77 Surrey Street East	Schnurr Electrical Department	Stone/Concrete Building
240 m N	99 Surrey Street East	Body & Fender Repairs	Stone/Concrete Building. No tanks.
200 m N	Southeast corner of Surrey Street & Wyndham Street South	Gasoline Service Station	Two (2) underground fuel storage tanks shown
250 m N	Southwest corner of Surrey & Neeve Streets	Gasoline Service Station	Three (3) underground fuel storage tanks shown. Wood framed “Oiling” building
235 m NE	47 Neeve Street	Burrow Textile Co. Ltd.	Concrete and wood framed building. Spinning, weaving, dye house & warehousing
130 n NE	West of Neeve Street, South of River	Harding Carpets Ltd.	No information
175 m W	100 Gordon Street	Hardy Motors Ltd.	Concrete building with brick face. Servicing and repair garage and show room. No tanks.

Due to copyright restrictions, a copy of the reviewed FIPs was not included in the report appendices.

3.1.4 Municipal Directories

EXP retained ERIS to conduct a City directory search of the properties within the Phase One Study Area. ERIS’s search was conducted for listings between 1912 and 2011, in approximately 5 year increments, in order to identify the occupancy history of the Site and adjacent properties. The available City of Guelph Street Directories dated 1913 to 1959 were reviewed at the Guelph Public Library as it was found that Wyndham Street South had changed names in approximately 1955 and was formerly Crawford Street. The findings of the directory search were reviewed and are discussed below:

Site Address	Occupant(s)	Years Occupied

68 Wyndham Street South	No Listing	2011
70 Wyndham Street South	Thrifty Car Rental	2006/07 - 2011
	DC Fine Motors	2011
	Wyndham Car Sales & Leasing	1996/97 – 2001/02
	R&R Auto Sales	1991/92
	Cunha's Auto Sales	1986
	BJ's Auto Sales	1981
	Budget Rent A Car	1976
76 Wyndham Street South	No Return	2011
	Residential	1981 - 2006/07
	Not Listed	1976
	Residential	1957 – 1971
	Not Listed	Prior to 1957
Crawford Street (west side, now Wyndham Street South)	Residential	1955
	Not Listed	Prior to 1955

The surrounding properties to the east and southeast were mainly residential with a church located at the corner of Margret and Howitt Streets. Properties to the northeast, north, west and southwest were largely commercial/light industrial properties including textile manufacturing operations to the northeast, retail fuel outlets to the north along Surrey and Wellington Streets, and automotive/manufacturing operations to the west across Wyndham Street south. The following is a summary of the occupancy of surrounding properties within the Phase One Study Area that may pose an environmental concern to the Site:

Direction	Property	Occupant(s)	Years Occupied
30 m W	3 Crawford Street (Now Wyndham Street South)	Kearney, JB, Corp of Can Ltd. Triumph Dishwashers Ltd.	1951 1947
30 m W	Crawford Street	Zephyr Looms & Textiles Ltd. Can Textile and Weaving Co.	1936 – 1942 1921 - 1931
20 m N	60 Wyndham Street South	Tricar Group	2001/02
30 m NW	67 Wyndham Street South	Majestic Plumbing and Heating Supplies Guelph Plumbing & Heating Supplies Lewis Tool & Die Parry Automotive	1986 1966 1966 1961
25 m W	71 Wyndham Street South	Tri-City Custom Machining Eden Energy Equip. Regal Air TNT Rental Centre Wyndham Plumbing & Home Care	2006/07 1991/92 - 2001/02 1986 - 2001/02 1986 - 2001/02 1986

		Fidler Auto Sales & Service Marlic Car Rentals Guelph Chrysler Plymouth Ltd. Manning Motor Car	1981 1981 1971 – 1976 1961 - 1966
25 m W	75 Wyndham Street South	E-Ride Electric Bikes Ghillet Canada Leaman Printing Ltd	2011 2006/07 1957 - 1959
30 m NW	33 Crawford Street (Now 67 Wyndham Street South)	Leaman Printing Ltd. Canadian Textile & Weaving Co. Ltd.	1955
25 m SW	77 Wyndham Street South	Dougan Assoc. Wyndham Launderama Stradwick Industries	2011 1961 – 1976 1966 - 1971
215 m NW	24 Wellington Street East	Cullen Chev-Olds Guelph Motor Products Guelph Spring & Axle Co.	1971 – 1976 1961 – 1966 1912 - 1955
165 m NW	58 Wellington Street East	Petrol Canada Gas Bar Wentzel Auto Service Inc. Harvey's Self Serve Gas Bar Wellington Self Serve Gas Bar Gulf Self Serve Gas Bar	2001/02 – 2011 2001/02 1996/97 1991/92 1986
120 m W	21 Wellington Street East	Mason Motor Coaches Mason Motors Hanover Transport Browns Cartage & Storage	1961 1955 1951 1945
100 m NW	23 Wellington Street East	Sketchley Cleaners U-Haul Co Stewarts Cleaners Canadian Tire Corp. Assoc. Store Canadian Tire Corp. Gas Bar	2001/02 1996/97 1986 - 1991/92 1966 - 1976 1971 - 1976
150 m W	33 Wellington Street East	Guelph Foundry & Millstock	1945 - 1955

3.1.5 Chain of Title

Chain of title information pertaining to ownership of the Site, from its initial development to its present use, was reviewed and is summarized below:

Year	Ownership Transfer From	Ownership Transfer To
2019	Richard Flaman	M. Flaman Productions Ltd.

2011	Michael Flaman Gloria Flaman	Richard Flaman Gloria Flaman
2008	Gloria Flaman Barbara Zuccala Donald Francis Zuccala	Gloria Flaman Michael Flaman
2003	Frank Joseph Zuccala Helen Marie Zuccala	Gloria Flaman Barbara Zuccala Donald Francis Zuccala
1949	Gladys McCann	Frank Joseph Zuccala Helen Marie Zuccala
1949	Guelph Yarns Ltd.	Frank Joseph Zuccala Helen Marie Zuccala
1943	Annie R Stauffer	Gladys McCann
1934	C. Stauffer	Annie R Stauffer
1933	O. Woods	C. Stauffer
1927	J. McCann	O. Woods
1917	Guelph Carpet Mill Company Ltd.	Guelph Carpet and Worsted Spinning Mills Ltd. (changed name to Guelph Yarns Ltd.)
1902	E. Howitt	J. McCann
1902	E. Howitt	Guelph Carpet Mill Company Ltd.
1900	Jane Howitt	E. Howitt
1876	Andrew Lemon	Jane Howitt
1872	Hugh White	Andrew Lemon
1861	Rob Richardson	Hugh White
1852	Samuel Crawford	Rob Richardson
1832	Canada Company (CROWN)	Samuel Crawford

A copy of the Site chain of title between 1832 and present is provided in Appendix D. The rationale for the selection of this time period was based on the land use history of the Site. M. Flaman Productions Ltd. has owned the Site since January 2019.

3.2 Previous Reports

A previous Phase I ESA was completed at the Site in November of 2009 by Trow Associates Inc. We completed a review of the previous report and the following is a summary of the findings:

- Based on the age of the Site buildings (prior to1960), possible asbestos containing materials (ACMs) include vinyl floor tiles, linoleum, ceiling tiles, textured finishes, roofing tars, roof felts, insulation, drywall, plaster and joint compound. All building materials observed at the time of the Site reconnaissance appeared to be in good condition.
- PCBs were used in fluorescent light ballasts manufactured prior to 1980. Based on the age of the Site buildings (prior to 1960) and the results of the Site visit, there is the potential that

PCBs-containing light ballasts may be present on-Site. These materials, if present, do not pose a risk to current occupants as long as they are in use and are in good condition (i.e. not leaking).

- Based on the age of the Site buildings (prior to 1960), there is a potential for the presence of mercury-containing thermostats in the building. Mercury-containing thermostats present no risk to the current occupants if in-use and in good condition. Due to the age of the Site buildings (prior to 1960), mercury/lead-containing paints may have historically been used. The painted surfaces observed during Trow's Site visit were observed to be in good condition, with evidence of peeling or flaking paint noted on the rear exterior wall of the car dealer office. If in poor condition, mercury/lead-containing paints may pose a health risk to occupants or workers from ingestion of paint chips or inhalation of mercury vapours and dust from preparing painted surfaces during renovations.
- A pad mounted air conditioning units services the residence onsite. This unit likely contains ozone depleting substance (R-22). Under the management of a licensed contractor, the subject system does not represent a significant impact to human health or the environment. However, these materials will require replacement by 2020 and as such consideration should be given to future phase out programs.
- If renovations or demolition is planned, it is recommended that potential ACMs, PCBs, mercury and ozone depleting substances are assessed and managed.
- It was reported by the Site owner that a property owner located approximately 50 m southeast of the Site had recently excavated environmentally impacted soils from their property. The property address is 72 York Road. An enquiry was made with the City of Guelph about environmental concerns in the area of the Site. It was reported that there was a substantial amount of foundry sand excavated from the property at 72 York Road.
- It was observed that a property at 71 Wyndham Street South had recent boreholes markings on the asphalt surface. The property is located approximately 25 m southwest of the Site. It was reported by the City of Guelph that they may have had concerns about a former underground storage tank for oil on their property.
- It was reported by the City of Guelph that the former Guelph Coal Gasification Plant operated at 25 Wyndham Street South, located approximately 250 m northwest of the Site.
- A drycleaner is located southwest of the Site at 49 Gordon Street. It was identified during a search of the MOE Waste Generator Database.
- A former dry cleaner was identified on a Fire Insurance Plan from 1960. The dry cleaner was located at 18-20 Carden Street, approximately 500 m northwest of the Site.
- There are currently two gas stations located northwest of the Site at 67 Surrey Street East (located approx. 210 m NW of Site) and 58 Wellington Street East (located approx. 170 m NW of Site). Both of the gas stations are located on the other side of the river and are over 150 m away from the Site. The gas stations are considered to be of low potential to environmentally impact the Site, based on the distance between the Site and the gas stations.
- A phase II ESA is recommended to investigate environmental concerns regarding the historic use of the surrounding properties.

3.3 Environmental Source Information

Different information sources including municipal and provincial government websites, municipal archives and private database were accessed for environmental source information pertaining to the Site and the Phase One Study Area.

3.3.1 MECP Environmental Bill of Rights Registry

The MECP Environmental Bill of Rights (EBR) registry website was searched for postings in the Phase One ESA study area. Search parameters included all streets within the Phase One Study area. No records were identified.

3.3.2 Hazardous Waste Information Network (HWIN)

The MECP Hazardous Waste Information Network (HWIN) database, as available online at www.hwin.ca, was searched for registered waste generators in the Phase One ESA study area.

A search of the HWIN database was conducted as part of ERIS search request completed during this investigation. No on-Site waste generators were identified and 90 records for off-Site locations, approximately 14 registered hazardous waste generators, were identified as discussed in Section 3.3.10 in the ERIS Section below.

3.3.3 Waste Disposal Sites

The MECP maintains an inventory of all known active and closed waste disposal Sites in Ontario. The review of Waste Disposal Site Inventory, published by the MECP, indicated the following:

- The Site was not identified as a location of a former waste disposal facility; and
- No active or closed waste disposal MECP Hazardous Waste Sites were identified within the Phase One Study Area.

3.3.4 Inventory of Coal Gasification Plants and Coal Tar Sites in Ontario

The document "*Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario" (*MECP, 1988) references information on former industrial facilities in Ontario that produced or used coal tar and other related tars. The information provided in this inventory includes: facility type, size, land use, soil condition, site operators/occupants, site description, and potential environmental impacts. The review of the Coal Gasification Plant/Coal Tar Site inventory did not identify any coal gasification sites within the Phase One Study Area.

3.3.5 Ontario Inventory of PCB Storage Sites

The MECP maintains an inventory of all known PCB storage Sites in Ontario. The review of the MECP Inventory of PCB Storage Sites in Ontario (1999, 2003, and 2004) indicated the following:

- The Site was not a registered PCB storage site; and

- There were no PCB Storage sites located within the Phase One Study Area.

3.3.6 MECP Brownfield Site Registry

A Record of Site Condition summarizes the environmental conditions of a property, as determined by a qualified person (QP), by conducting a Phase One ESA, a Phase Two ESA and where necessary, remediation and/or confirmatory sampling and/or risk assessment. Upon completion of the necessary environmental site assessments, an RSC for an assessed property can be filed with the MECP and added to the Brownfields Environmental Site Registry (BESR) database. This online, accessible public database can be searched to identify what properties may have potential environmental concerns and holds records from 2004 to present.

Based on the search of the MECP's BESR database conducted on May 17, 2019, RSCs within the Phase One Study area were noted and summarized below.

- 84 and 86 Wyndham Street South and 68 and 72 York Road – located 30 m southeast of the Site was filed in June 2011 prior to the amendments to O. Reg. 153/04 that were implemented on July 1, 2011. A Phase One and Two Environmental Site Assessment was completed at the property. Approximately 5,428 cubic metres of impacted soils were removed from the property including soils located within 3 m of the property boundary. Groundwater testing was also conducted.

3.3.7 Ministry of the Environment and Climate Change

A request for information was submitted to the Ontario Ministry of the Environment and Climate Change (MECP) Freedom of Information, Protection of Privacy Office for information in their files regarding the Site that pertain to any Environmental Concerns, Orders and Spills. A copy of the request is included in Appendix E.

A written response from the MECP typically requires several months. If upon receipt of the response from the MECP, any significant environmental issues are identified, EXP will forward the ministry's response to the City of Waterloo as an addendum to this report.

3.3.8 Technical Standards and Safety Authority

A request for information regarding the Site was made via email to the Technical Standards and Safety Authority (TSSA). The request was made on May 17, 2019. A reply from the TSSA on May 21, 2019 indicated they had no records of any registered tanks at the Site. Expired propane cylinder handling facilities were identified at both 71 and 75 Wyndham Street South located west of the Site across Wyndham Street South.

A copy of the request to TSSA and the response is provided in Appendix F.

3.3.9 Municipal Records

An environmental records request was forwarded via email to Region of Guelph. The request was forwarded and payment for the search was processed on May 27, 2019. A response from the Region is yet

to be received. Upon receiving a response from the City of Guelph, EXP will revise this Report with any environmental concerns identified in the municipal records.

3.3.10 Environmental Risk Information Services Ltd. (ERIS)

EXP obtained a records and regulatory agency database review through ERIS. The ERIS report includes a review of public and private database records for the Site and covers an approximate 250 metre (m) radius of the surrounding properties of the Site. The report includes a site diagram and a summary, which describe records that relate directly to the Site and records found within the Phase One Study Area. It should be noted that, in some cases, certain database respondents are not able to be accurately located by ERIS due to lack of specific address information. These database respondents will therefore show up on the information query although they may, in fact, be nowhere near the Site or the Phase One ESA Study Area. In these cases, they are denoted as “n/a” in the ERIS report. For the referenced ERIS report, none of the “n/a” listed respondents were included, as they could not be accurately determined as being within the Phase One Study Area. A summary of the report is below and included Appendix H. The following records pertaining to the Phase One Study Area were identified:

Database Name	Database	On Site	Within 250 M
Certificates of Approval	CA	0	3
Compliance and Convictions	CONV	0	2
Environmental Activity and Sector Registry	EASR	0	1
Environmental Registry	EBR	0	2
Environmental Compliance Approval	ECA	0	3
ERIS Historical Searches	EHS	0	14
List of TSSA Expired Facilities	EXP	0	4
Fuel Tank Storage	FST	0	13
Fuel Tank Storage – Historical	FSTH	0	6
Ontario Regulation 347 Waste Generators Summary	GEN	0	90
TSSA Historic Incidents	INC	0	3
National PCB Inventory	OPCB	0	3
Orders	ORD	0	1
Record of Site Condition	RSC	0	1
Retail Fuel Storage Tanks	RST	0	1
Scott’s Manufacturing Directory	SCT	0	10
Ontario Spills	SPL	1	20
Water Well Information System	WWIS	0	40
TOTAL RECORDS		**1**	**235**

A total of 236 records were identified by ERIS, one (1) of which was identified for the Site. The information presented in the Borehole (BORE) and Water Well Information System (WWIS) database is not considered

to contain information pertaining to potentially contaminating activities and therefore is not described further. Water wells are summarized in Section 3.4.5.1.

A summary of the ERIS report is provided below. The key references and distances are provided within the ERIS report.

Key	Address	Location Direction/Distance (m)	Data	Description
1	76 Wyndham Street South	**SITE**	**SPL**	Residential – Leak/break in natural gas line in 2016
7	71 Wyndham Street South	**WSW/57**	**PRT**	TNT Rental Centre Ltd. – Retail fuel tank expired in 1995 (type of fuel unspecified)
7	71 Wyndham Street South	**WSW/57**	**EHS**	ERIS Historical Report in 2009
7	71 Wyndham Street South	**WSW/57**	**EXP**	TNT Rental Centre Ltd. – Propane Cylinder Handling Facility (Expired – date unspecified)
10	71 Wyndham Street South	**WSW/60**	**EHS**	ERIS Historical Report in 2016
11	66 York Road	**SE/60**	**PINC**	Damaged natural gas pipeline in 2016
11	66 York Road	**SE/60**	**SPL**	Residential – Leak/break in natural gas line in 2016
12	84-86 Wyndham Street South & 68-72 York Road	**E/61**	**RSC**	Terra View Riverside Ltd. – Record of Site Condition filed to support residential property use in 2011
14	75 Wyndham Street South	**SW/68**	**EHS**	ERIS Historical Report in 2013
14	75 Wyndham Street South	**SW/68**	**EXP**	TNT Rental Centre Ltd. – Propane Cylinder Handling Facility (Expired – date unspecified)
14	75 Wyndham Street South	**SW/68**	**PRT**	TNT Rental Centre Ltd. – Retail fuel tank expired in 1994 (type of fuel unspecified)
16	71 Wyndham Street South	**SW/71**	**GEN**	Rykur Holdings Inc. – Waste Generation of: Waste Oils and Lubricants as of December 2018
17	75 Wyndham Street South	**SW/71**	**GEN**	Wyndham Medical Inc. – Waste Generation of: Pathological Wastes from 2015 to 2018 Pharmaceuticals from 2015 to 2016
18	Wyndham Street North at York Road	**SSE/90**	**SPL**	Road – Transport incident resulting in spill of manure to land
19	Wyndham Street and York Road	**SE/92**	**ECA**	City of Guelph – municipal sewage and municipal water in 2015
19	Wyndham Street and York Road	**SE/92**	**SPL**	Royal City Park – Watercourse Spill of foam/water from bridge fire in 2015

Key	Address	Location Direction/Distance (m)	Data	Description
19	Wyndham Street and York Road	**SE/92**	**SPL**	York Road and Wyndham Street Intersection – Motor vehicle accident resulting in 60 litres of motor oil released to roadway in 2006
22	70 York Road	**ESE/96**	**EHS**	ERIS Historical Report in 2007
23	46 York Road	**SSW/109**	**SPL**	Saddle tank leak from tanker truck resulted in 113 litres of fluid to ground in 1988
25	23 Wellington Street East Unit 5	**W/140**	**GEN**	1530925 Ontario Inc. – Waste Generation of: Pathological Wastes as of December 2018
25	23 Wellington Street East Unit 4	**W/140**	**SCT**	The Futon Shop – Wood household furniture manufacturing and mattress manufacturing in 1985
25	23 Wellington Street	**W/140**	**SPL**	BFI Canada Inc./Angel's Diner – Spill of 50 litres of oil to ground and catch basin in 2003
25	23 Wellington Street	**W/140**	**SPL**	City of Guelph Bus/Mr. Sub – Spill of 10-15 litres of diesel to street, catch basin and speed river in 2001
25	23 Wellington Street	**W/140**	**SPL**	Angel's Diner – Grease release to storm sewer, catch basin and bank in 2009
28	7367 Wellington Road 30	**W/166**	**EBR**	Mann Construction Ltd. – Approval to discharge to natural environmental other than water (air) in 1996
29	87 Neeve Street	**N/170**	**CA**	Victor Davis Memorial Court Non-Profit – Industrial air CA for emergency diesel generator in 1994
30	7468 Wellington Road 51	**NW/173**	**GEN**	Corporation of the County of Wellington Roads Department – Waste Generation of: Paints, pigments and coating residues 2018 Aromatic solvents 2018 Aliphatic solvents 2018 Light fuels 2018 Waste oils and sludges 2018 Waste oils and lubricants 2018
32	5066 Wellington Road 32	**WNW/176**	**SCT**	Daly's Wood Products Ltd. – Upholstered household furniture manufacturing and other wood household furniture manufacturing in 1984
33	7602 Wellington Road 32	**WNW/180**	**GEN**	Tervita Corporation – Waste Generation of: Waste oils and lubricants from 2011 to 2012
33	7602 Wellington Road 32	**WNW/180**	**GEN**	Hazco Environmental Services – Waste Generation of: Waste oils and lubricants in 2010
34	85 Neeve Street	**N/180**	**CA**	Guelph Non-Profit HSG Corp. – Industrial air CA for emergency power for senior's residence in 1995
35	86 Gordon Street	**WSW/182**	**PES**	National Grocers Co. Ltd./Steve's Valu-Mart – Record in pesticide register

Key	Address	Location Direction/Distance (m)	Data	Description
36	58 Wellington Street East	**WNW/186**	**EHS**	ERIS Historical Report for RSC report in 2017
36	58 Wellington Street East	**WNW/186**	**EXP**	1579149 Ontario Ltd. – Expired TSSA Facility
36	58 Wellington Street East	**WNW/186**	**FST**	Suncor Energy Products Partnership – FS Liquid fuel tank – Active 36,700 litre, single walled fibreglass gasoline tank installed in 1982 (3 entries)

55	92 Gordon Street	**SW/230**	**GEN**	Parkers Cleaners – Waste Generation of: Halogenated Solvents 1986 - 1998
56	141 Neeve Street	**NE/231**	**SCT**	Bartlett Woodworking – Wood furniture manufacturing in 2001

Key	Address	Location Direction/Distance (m)	Data	Description
58	47 Surrey Street East	**W/233**	**GEN**	City of Guelph – Waste Generation of: Organic Laboratory Chemicals 2013
59	67 Surrey Street East	**NW/233**	**EBR**	Flewelling Garage Ltd. – Proposal for liquid fuels handling 2012
59	67 Surrey Street East	**NW/233**	**FST**	Flewelling Garage Ltd. – Record of four underground storage tanks, gasoline and diesel, steel and single walled tanks between 15,000 and 45,000 litres capacity installed in 2008. Record of one double walled gasoline underground storage tank with a capacity of 100,000 litres installed in 2013.
59	67 Surrey Street East	**NW/233**	**HINC**	TSSA Historic Incident – 10 litre leak from faulty valve gasket in tanker truck.
59	67 Surrey Street East	**NW/233**	**PRT**	Norm Flewelling Ltd. Norm's Esso – Record of retail fuel outlet 1995
59	67 Surrey Street East	**NW/233**	**RST**	Norm's Esso Service – Record of service station for gasoline, oil and natural gas
59	67 Surrey Street East	**NW/233**	**SPL**	Esso Petroleum Canada – 50 litres of gasoline to ground while filling above ground tank in 1994
59	67 Surrey Street East	**NW/233**	**SPL**	RST Transport – 10 litre spill of gasoline to Esso retail lot
61	83 Neeve Street	**N/237**	**GEN**	Bank of America Canada – Waste Generation of: PCBs 1993 - 1998
61	83 Neeve Street	**N/237**	**NPCB**	The Bank of America – Record in National PCB Database 1994 1996
66	20 Wellington Street East	**W/246**	**SPL**	A&W Restaurant – 20 litre sewage spill to catch basin
67	20 Wellington Street East	**W/248**	**EHS**	ERIS Historical Report for standard report in 2012
68	64-80 Gordon Street	**WSW/250**	**GEN**	Alfred Schnurr Electric Company LTD. – Waste Generation of: Waste oils and lubricants 2013 - 2018 Petroleum distillates 2013 – 2018 Polymeric Resins 2016 - 2018

Note: KEY – Key reference number as denoted in the ERIS report.
DIR. – direction from the Site.
DATA – Database
Directions are referenced from geodetic (true) north.
Records located outside of the Phase I ESA Study Area (greater than 250 m separation distance) are not described and were not considered to have likely contributed to an APEC at the Site.

3.4 Physical Setting Source

A variety of information sources, consisting of aerial photographs, topographic and geologic maps and water records, were reviewed for information pertaining to the physical setting of the Site and surrounding area.

3.4.1 Aerial Photographs

Aerial photographs dated 1930, 1964, 1974, 1981, 1990, and 1995 were obtained from ERIS. Aerial images dated 2006 and 2018 were obtained from Google Earth Imagery. The aerial photographs were reviewed for information relating to the development and land use history of the Site and surrounding area. Copies of the aerial photographs are provided in Appendix I. The findings of the aerial photograph review are as follows:

Aerial Photograph Date	Interpretation
1930	• The Site and the properties located west of Wyndham Street South appear to be vacant and undeveloped. • The Speed and Eramosa Rivers are visible north and south of the Site, respectively. • Single family residential dwellings are visible along Howitt Street and York Road. • A large inferred commercial/industrial building is visible on the northwest corner of Neeve and Margaret Streets, north of Howitt. • Inferred commercial properties are located across the Speed River along Wellington and Surrey Streets.
1964	• The Site appears to have been developed with an inferred commercial building on the central portion of the Site. The northern portion of the Site appears to be covered in asphalt. • An inferred residential dwelling is located on the southwest portion of the Site. • Residential properties have been developed south of the Site along York Road. • Large inferred commercial/industrial buildings have been constructed west of the Site across Wyndham Street South. Vehicle storage is noted on these properties. • The remainder of the surrounding properties appear to have been unchanged since the previous aerial image.
1974	• No significant changes were noted at the Site or the surrounding properties.
1981	• The Site appears to have been largely unchanged since the previous aerial image with the exception of vehicle storage noted on the northern portion of the Site.

Aerial Photograph Date	Interpretation
	• Additions appear to have been constructed on the inferred commercial/industrial properties located northeast of the Site (west of Neeve Street between the river and Howitt Street), and west of the Site across Wyndham Street South.
1990	• No significant changes were noted at the Site or the surrounding properties.
1995	• No significant changes were noted at the Site. • The inferred commercial/industrial building located northeast of the Site appears to have been re-developed with multi-unit residential buildings.
2006	• No significant changes were noted at the Site or the surrounding properties with the exception of a third multi-unit residential building having been constructed on the northeast corner of Wyndham Street South and Howitt Street.
2018	• No significant changes were noted at the Site or the surrounding properties with the exception of the townhouse redevelopment located southeast of the Site along York Road.

3.4.2 Topography, Hydrology and Geology

The topography, hydrology and geology of the general Site area was reviewed from geological maps and other information sources. Information from these maps is summarized as follows:

The Site is reported to be located within the physiographic region known as the *Guelph Drumlin Field* (Chapman & Putnam, 1984) which consists of approximately 300 drumlins of all sizes.

The topography in the area of the Site is relatively flat, with gentle slopes to the south and east. The regional groundwater flow is anticipated to migrate towards Speed River, located approximately 120 m west of the Site, 180 m to the south of the Site or 220 m to the east of the Site, however, the local groundwater flow may be influenced by the presence of infrastructure and other site-specific characteristics (1990 Natural Resources Canada Topographic Map #040P09)

According to the “Ministry of Northern Development and Mines Quaternary Geology” Map 2556, the soil geology in the vicinity of the Site consists of glaciofluvial outwash deposits, which consists of predominantly gravel and sand; including proglacial river and deltaic deposits.

Bedrock in this area consists of Guelph Formation Dolostone deposited during the Middle and Lower Silurian Period (Bedrock Geology of Ontario, Map 2544, Southern Sheet).

1990 Natural Resources Canada Topographic Map # 040P09 (see Figure 1)

The review of the topographic map identified the following:

3.4.3 Fill Materials

According to the current Site owner, it is believed that fill material was previously brought to the Site prior to the development of the lands over 100 years ago. Fill material was also likely brought to the Site during the construction of the current Site buildings. The origin and quality of the fill material is unknown.

3.4.4 Water Bodies and Areas of Natural Significance

At its closest point the Site is located approximately 70 m south of the Speed River which runs north and west of the Site where it converges with the Eramosa River approximately 190 m south of the Site.

Different sources were searched including the Ontario Ministry of Natural Resources (MNR) to confirm whether an ANSI is found with 250 m of the Site (i.e., Phase One Study Area). No Areas of Natural or Scientific Interest (ANSI) were identified within the Phase One ESA Study Area. The Site is not considered to be an environmentally sensitive site based on proximity to an ANSI as identified by the Ministry of Natural Resources and in reference to Section 41 of O. Reg. 153/04.

3.4.5 Well Records

3.4.5.1 Water Wells

The MECP Well Record website (ontario.ca/environment-and-energy/map-well-records) was accessed for information on water wells located within the Phase One Study Area. There are approximately thirty-eight (38) water wells located within the Phase One Study Area, thirty-one (31) of these were test holes or observation wells, and seven (7) unknown.

3.5 Site Operating Records

No operating records were available for the Site.

4. Interview

An interview was conducted by EXP with individuals identified to be the most knowledgeable about both the current and historic Site uses. The interview was conducted to obtain information to assist in identifying details of potentially contaminating activities and areas of potential environmental concern at the Site.

Mr. Michael Flaman, the current owner of the Site, was interviewed by email on April 15, 2019. Mr. Flaman was interviewed as a person having extensive knowledge of the development history of the Site and surrounding area. A copy of EXP's questionnaire is provided in Appendix J.

The interview consisted of questions pertaining to:

- Industrial and commercial land uses of the Site and surrounding properties;
- Storage or use chemicals at the Site;
- Specific industrial operations at the Site and surrounding properties;
- The presence of pits. ponds, stained soils, storage tanks and related equipment or leaks or spills at the Site;
- Private wells at the Site;
- The presence of hazardous substances or petroleum products or waste materials buried at the Site;
- The presence of transformers or hydraulic equipment at the Site.

The Site was identified as having been occupied by a used car sale business and truck rental business. The Phase One Property is currently rented for parking purposes. Information from the interview did indicate the potential for the importation of fill material of unknown origin and quality as well as a former heating oil AST in the basement of the residence.

5. Site Reconnaissance

5.1 General Requirements

The Phase One ESA Site reconnaissance was conducted on April 11, 2019 between 2:30 pm and 4:30 pm by Chris Friedmann, C.E.T. On the day of the Site reconnaissance, the weather was overcast, with a high temperature of 4°C.

Photographs documenting the Site Reconnaissance are provided in Appendix K.

5.2 Specific Observations at Phase One Property

5.2.1 Site Description and Buildings

The Site is an approximate 0.13 hectares (0.32 acres), "L"-shaped property located at 68 & 76 Wyndham Street South in the south downtown portion of the City of Guelph. The Site occupies the northwest corner of the block bounded by Howitt Street to the north, Wyndham Street South to the west, York Road to the south and Neeve Street to the east. At the time of this Phase One ESA, the Site was in use as a residence occupied by students and a vacant commercial building with a parking lot. The north portion of the Site consisted of an asphalt parking lot currently rented for parking.

The Site includes approximately 62 metres (203 feet) of frontage along Wyndham Street South and approximately 15 metres (49 feet) of frontage along Howitt Street. A Site location plan is provided in Figure 1 and a Site and Surrounding Property Use plan in Figure 2.

5.2.2 Heating and Cooling Systems

The residential house at 76 Wyndham Street South was equipped with a forced-air natural gas-fired furnace with central air conditioning. The commercial building located at 68 Wyndham Street South was equipped with a forced-air natural gas-fired furnace as well. A portable air conditioner was observed in a through-wall opening (former window).

5.2.3 Site Utilities and Services

The Site is currently serviced with natural gas, electrical and water services as well as sanitary sewers and storm sewers at the road edges. The vacant commercial unit has the gas and hydro meters removed, as they are not currently in service. The general Site area is serviced by the following utilities:

- Potable water from the City of Guelph Distribution System, which is sourced from groundwater and the surface water of the Eramosa River.
- The general Site area is serviced by the City of Guelph sanitary and storm sewer systems. Sanitary sewers are connected to both 68 & 76 Wyndham Street South. No storm water catch basins were noted on-Site.

- Hydro by overhead lines.
- Telephone, cable/internet natural gas by buried utilities
- Telephone by Bell Telephone.
- Hydro is provided by Alectra Utilities (formerly Guelph Hydro).
- Natural gas is provided by Union Gas.
- The utilities to 68 Wyndham Street South are currently not in use.

5.2.4 Site Production and Manufacturing

No production or manufacturing operations were identified during the Site visit.

5.2.5 Drains, Pits and Sumps

No drains, pits or sumps were noted on-Site.

5.2.6 Storage Tanks

The presence/absence and condition (if present) of Underground Storage Tanks and Aboveground Storage Tanks (ASTs) at the Site were assessed during the Site visit. No ASTs were observed and no evidence (i.e., Vent or fill pipes) of USTs were observed during EXP's Site visit. It was reported in a previous Phase I ESA that an AST for heating oil was historically present in the basement of 76 Wyndham Street South.

5.2.7 Site Housekeeping

The commercial building located at 68 Wyndham Street South was vacant at the time of the Site visit. The Utilities were shut off and the parking lot area was in use for rental parking. Most of the surface of 68 Wyndham Street South was covered in asphalt, exhibiting some alligator cracking. The 76 Wyndham Street South property had grassed areas to the north, west and east of the house. The area to the south of the house was an asphalt driveway. The driveway led to a detached garage which had a concrete slab-on-grade. There was also a concrete patio located east of the house. The front of the house was landscaped with trees and bushes and the rear yard had some trees.

5.2.8 Chemical Storage and Handling

Light cleaning products and small paint containers (4L) were observed in the residence and the commercial building, as well as the garage. A few small containers of caulking, polyurethane, and solvents (WD40) were observed in the garage. A small plastic "Jerry Can" of fuel was observed on the floor of the garage beside a chain saw.

5.2.9 Areas of Stained Soil and Pavement

No significant surficial staining indicative of large releases of potentially contaminating compounds were observed at the time of EXP's Site visit.

5.2.10 Areas of Stressed Vegetation

The vegetation on- and off-Site appeared to be in good condition with no obvious indications of stress.

5.2.11 Fill and Debris

No evidence of significant fill material placement was observed on-Site at the time of EXP's Site visit. However, it was reported by the owner that silt fill materials were brought into the area of the Site prior to the construction of the residences in the area. During the previous Phase I ESA conducted in 2009, it was observed that an environmental clean up was being conducted at a property located approximately 60 m to the southeast. Apparently metals impact was found in fill materials reported from a foundry.

5.2.12 Air Emissions

Air emissions in Ontario are regulated under the Environmental Protection Act (EPA) and its Regulations (O. Reg. 419/05, O. Reg. 245/11). Owners and operators of activities that may discharge a contaminant into the natural environment must seek approval from the Ministry of the Environment (ministry) to carry out these activities. As of October 31, 2011 amendments to the EPA resulted in a two path environmental approval process, the Environmental Compliance Approval (ECA) and Environmental Activity and Sector Registry (EASR). The EASR allows businesses to register certain activities with the ministry, rather than apply for approvals. The EASR is for common systems and processes, currently for heating systems, standby power systems and automotive refinishing, to which preset rules of operation can be applied. Unless explicitly exempted, most industrial processes or modification to industrial processes and equipment require an ECA, formerly a Certificate of Approval (Air and Noise). Retroactive approval should be sought for equipment installed and unchanged between 1972 and June 29th, 1988 when the requirement for a Certificate of Approval was added to the EPA. The EPA provides a list of specific equipment and conditions, which are exempt from approval requirements (i.e. fuel burning equipment for comfort heating in a building using natural gas or number 2 fuel oil at a rate of less than 1.5 million kilojoules per hour [BTU/hour]). No significant air emissions were identified during the Site visit. However, EASR registration may be required for combustion equipment, as the heating equipment may exceed a rate of more than 1.5 million kilojoules per hour.

The Site was occupied by a residence and a vacant small commercial building at the time of the reconnaissance conducted on April 11, 2019. The Site is proposed for residential development consisting of low-rise residential dwellings and as such, based on the size of the proposed units, an ECA is not required.

Based on the findings of this investigation and current Site development, neither a ECA or EASR for air emissions are require at this time at the Site.

5.2.13 Odours

No strong odours were detected during the Site visit.

5.2.14 Noise

No excessive noise was detected during the Site visit.

5.2.15 Hazardous Building Materials and Designated Substances

Asbestos

Asbestos-containing materials (ACMs) are fibrous hydrated silicates, and can be found in building materials as either "unbound" or "bound" asbestos. Friable asbestos refers to materials where the asbestos fibres can be separated from the material with which it is associated. Non-Friable asbestos refers to asbestos, which is associated with a binding agent (such as tar or cement). Friable asbestos is commonly found in boiler and pipe insulation. Non-Friable asbestos is typically found in roofing tars, floor and ceiling tiles, and asbestos-containing cement.

ACMs in the workplace are defined as a Designated Substance under the Ontario Occupational Health and Safety Act (OHSA). Under OHSA, persons in the workplace are required to be notified of the presence of ACMs once they are suspected to be present, and if there is a potential for workers to be exposed. The use of ACMs was discontinued in Canada in the late 1970s/early 1980s, although non-friable asbestos can still be found in recently constructed buildings.

Based on the age of the Site buildings (prior to 1960), possible ACMs include vinyl floor tiles, linoleum, ceiling tiles, textured finishes, roofing tars, felts, insulation, drywall, plaster and joint compound. These materials do not pose a risk to current occupants as long as they are in good condition. Most building materials observed were in good condition, with minor damage to ceilings noted. EXP did not conduct any sampling for asbestos during the Site reconnaissance.

Lead

Lead has frequently been used in oil-based paints, roofing materials, cornices, tank linings, electrical conduits and soft solders for tinplate and plumbing. The use of lead based paints (LBPs) was phased out circa 1976. Paint that was produced or used between 1976 and 1980 may contain small amounts of lead. Paint that was produced or used prior to 1950 may contain high levels of lead. The main concern regarding lead paint is its potential to become lead dust or chips either through deterioration and/or mechanical means (i.e., sanding, abrasion, etc.). Exposure to lead dust or chips occurs by ingestion or inhalation.

Based on the age of the site buildings (prior to 1960), it is possible that paint containing lead is present onsite. The condition of the painted surfaces within the structures was generally good. Some exterior paint observed on the vacant commercial structure was observed to be peeling.

Mercury

Mercury could be found in some batteries, light bulbs, old paints, thermostats, old mirrors, etc. Based on an investigation by Consumer and Corporate Affairs Canada, and an assessment of potential health risks by Health and Welfare Canada, in 1991 the decision was made to eliminate the use of mercury compounds in indoor latex paints. The Canadian Paint and Coatings Association (CPCA) supported the withdrawal and all Canadian manufacturers and formulators of the preservative voluntarily agreed to remove “interior uses” from their product labels.

Based on the age of the Site buildings (prior to 1960), there is a potential for the presence of mercury-containing thermostats in the buildings. Mercury-containing thermostats present no risk to the current occupants if in-use and in good condition. Due to the age of the Site buildings (prior to 1960), mercury containing paints may have historically been used. The painted surfaces observed during EXP’s Site visit were observed to be in good condition, with evidence of peeling or flaking paint noted on the rear exterior wall of the car sales office.

If in poor condition, mercury containing paints may pose a health risk to occupants or workers from ingestion of paint chips or inhalation of mercury vapours and dust from preparing painted surfaces during renovations.

In addition, batteries, fluorescent lights, thermostats, or other mercury containing materials may be present within the Site buildings. As long as the items mentioned above are in good condition, they can continue to be used.

Polychlorinated Biphenyls

The manufacture of PCBs in North America was prohibited under the Toxic Substances Control Act (1977). Their use as a constituent of new products manufactured in or imported into Canada was prohibited by regulations in 1977 and 1980. As such, sites developed or significantly renovated after 1980 are unlikely to have PCBs-containing equipment on the Site. Potential equipment, which could contain PCBs include fluorescent mercury and sodium vapour light ballasts, oil filled capacitors and transformers. Any electrical equipment containing PCBs must be disposed in accordance with Ontario Regulation 362 when it is removed from service. Ongoing operation of equipment containing PCBs is permissible.

A review of the Site was conducted to evaluate the potential presence of PCBs-containing equipment in use or stored at the Site. There is potential that PCBs-containing ballasts may be present onsite. These materials, if present, do not pose a risk to current occupants as long as thy are in use and in good condition (not leaking).

Urea Formaldehyde Foam Insulation

Formaldehyde is a pungent, colourless gas commonly used in water solution as a preservative and disinfectant. It is also a basis for major plastics, including durable adhesives. It occurs naturally in the human body and in the outdoor environment. Formaldehyde is used to bond plywood, particleboard, carpets and fabrics, and it contributes to "that new house smell.

Formaldehyde is also a by-product of combustion; it is found in tobacco smoke, vehicle exhaust and the fumes from furnaces, fireplaces and wood stoves. While small amounts of formaldehyde are harmless, it is an irritating and toxic gas in significant concentrations. Symptoms of overexposure to formaldehyde include irritation to eyes, nose and throat; persistent cough and respiratory distress; skin irritation; nausea; headache; and dizziness.

Urea-formaldehyde foam insulation (UFFI) was developed in Europe in the 1950s as an improved means of insulating difficult-to-reach cavities in the walls. It is typically made at a construction site from a mixture of urea-formaldehyde resin, a foaming agent and compressed air. When the mixture is injected into the wall, urea and formaldehyde unite and "cure" into an insulating foam plastic.

During the 1970s, when concerns about energy efficiency led to efforts to improve building insulation in Canada, UFFI became an important insulation product for existing buildings. Most installations occurred between 1977 and the further use of UFFI was banned in Canada in 1980.

No evidence of UFFI injection was identified during the Site visit no UFFI was observed on-Site.

Ozone Depleting Substances

Chlorofluorocarbons (CFCs) often referred to as Freons, ceased production in Canada in 1993 as a result of their ozone-depleting characteristics. Importation of CFCs into Canada ceased in 1997 and a total ban on their use is proposed for 2030. The use of these materials is still permitted in existing equipment, but equipment must be serviced by a licensed contractor such that CFCs are contained and not released to the environment during servicing or operation.

Under the management of a licensed contractor, the subject systems do not represent a significant threat to human health or the environment. However, if present, CFCs will require replacement by 2030 and as such consideration should be given to future phase out programs.

The house at 76 Wyndham Street South was observed to have a central air conditioning unit located on the exterior of the house on the north side. A through wall portable air conditioning unit was observed at the vacant commercial building at 68 Wyndham Street South. The types of refrigerant used are not known and they may contain ODS.The equipment should only be repaired, removed, or serviced by an appropriately licensed contractor.

5.2.16 Radon

Radon is a colourless, odourless, radioactive gas that occurs naturally in the environment. It comes from the natural breakdown of uranium in soils and rocks. Exposure to high levels of radon increases the risk of developing lung cancer. This relationship has prompted concern that radon levels in some Canadian buildings may pose a health risk. Radon gas can move through small spaces in the soil and rock and seep into a building through cracks in concrete, sumps, joints and basement drains. Concrete-block walls are particularly porous to radon and radon trapped in water from wells can be released into the air when the water is used.

Due to the potential health concerns associated with radon, Health Canada released a guideline in June 2007 for a maximum acceptable level of radon gas of 200 becquerels per cubic metre (Bq/m3). Where radon gas is present and the annual radon concentration exceeds 200 Bq/m3 in the normal occupancy area, Health Canada recommends taking the necessary actions to reduce radon levels.

Typically, radon is not a significant environmental concern in southern Ontario. However, the presence of Radon at the Site can only be determined by actual testing which was beyond the scope-of-work for this assessment.

5.2.17 Mould

Mould is found in the natural environment and is required for the breakdown of plant debris such as leaves and wood. Mould spores are found in the air in both the indoor and outdoor environments. In order for mould to grow it requires a food source (i.e. gypsum wallboard, carpets, wallpaper, wood, etc.) and moist conditions. Mould can have an impact on human health depending on the species and concentration of the mould. Health effects can include allergies and mucous membrane irritation.

Currently there are no regulations governing mould; however, there are several guidelines addressing mould assessments and abatement. At the moment the industry standards include the Canadian Construction Association (CCA) document 82-2004 titled “mould guidelines for the Canadian construction industry” and the Environmental Abatement Council of Ontario (EACO) guidelines titled “EACO Mould Abatement Guidelines, Edition 2 (2010)”.

It is important to note that The Ministry of Labour (MOL) has governed protecting workers under the Occupational Health and Safety Act, which states that employers are required to take every precaution reasonable to protect their workers. This includes protecting workers from mould within workplace buildings.

The residence onsite had a small area of water damaged ceiling, located under the second floor washroom. No evidence of significant mould growth was observed in this area or anywhere else onsite, observed during the Site visit.

5.3 Enhanced Investigation Property Observations

Part VIII, Subsection 32 (1) of O. Reg. 153/04, as amended by O. Reg. 511/09, defines the Site as an Enhanced Investigation Property if:

(a) during a Phase One ESA of the property, a potentially contaminating activity is identified on, in or under the property; or

(b) if the property is used, or has ever been used, in whole or in part for an industrial use or for any of the following commercial uses,

(i) as a garage,

(ii) as a bulk liquid dispensing facility, including a gasoline outlet, or

(iii) for the operation of dry-cleaning equipment. O. Reg. 511/09, s. 14.

Part VI of O.Reg. 511/09 defines an Enhanced Investigation Property as (i) a property used, or has ever been used, in whole or part, for an industrial purpose, or (ii) a commercial property used as a garage, a bulk liquid dispensing facility, including a gasoline outlet or for the operation of dry-cleaning equipment.

Based on the historic records review, the Site was first developed with a residence and an ice cream store. The residence is still present and the ice cream store was later used as a pizza parlour, a used car sales lot and a rental car lot. There is no shop area in the commercial building and to the best of our knowledge, car repairs were not conducted on-Site; however, as part of the vehicle sales and rental operations, vehicles would have been stored at the Site. The northern portion of the Site is currently used as a private paid parking facility. Review of information obtained during this investigation did not indicate the historic presence of automotive garages, retail fuel outlets and/or dry-cleaning operations at the Site. Based on the storage of vehicles and the importation of fill of unknown quality the Site is considered an enhanced investigation property.

5.4 Adjacent and Surrounding Properties

A visual inspection of the adjacent properties and properties to the Site was conducted from publicly accessible areas to identify the occupants and document the uses and sources of PCAs that may have impacted the Site. Land uses of surrounding properties are shown on Figure 2. In general, the properties immediately surrounding area consisted of residential houses and apartment/condominium buildings. Land uses within the 250 metres of the Site consisted of residential, institutional, commercial and open space/municipal parkland development. Land uses of surrounding properties are identified in Figure 2 and summarized below as follows:

- Northeast - residential (single residences and apartments on Howitt Street) and green space beyond (river north of Howitt Street)
- Southeast – residential (single detached residences and townhouses on Wyndham Street South and York Road) and green space beyond (river and park south of York Road)
- Southwest – residential (on York Road) and commercial (on Wyndham Street South)
- Northwest – residential, commercial and community use (fitness training, community workshop and residential)

5.5 Written Description of Investigation

The Site investigation was completed, as outlined in Section 2 of this Report. The investigation consisted of a Site reconnaissance, a review of records and documents of relevance to the Site and requests for searches of records from different authorities for information pertaining to the Site.

Different authorities, including the Region of Waterloo, the TSSA, the City of Waterloo and the MECP, were contacted by EXP in regards to records and background information pertaining to the Site and surrounding areas. Published records, documents and databases including the HWIN database, aerial photographs, fire insurance plans, the MECP brownfields site registry, inventory of PCB storage sites, waste disposal site inventory, the inventory of coal gasification plant waste sites in Ontario and previous environmental and geotechnical reports were also reviewed. Neighbouring properties were reviewed from accessible public areas to assess for potential contaminating activities. An interview was conducted with the current owner of the Phase One Property, who was knowledgeable of the development history of the Site and surrounding area.

6. Review and Evaluation of Information

6.1 Current and Past Uses

To date, the Site, at least in part, has been owned by independent persons with the exception of Guelph Carpet Mills Company (also known as Guelph Carpet and Worsted Spinning Mills Ltd. and Guelph Yarns Ltd.) between 1902 and 1949. However, the fire insurance plans (FIPs) reviewed did not provide coverage of the Site, indicating that the Site was not developed at the time the Site was owned by Guelph Carpet Mills Company. According to aerial photographs, the Site is occupied by an inferred residential dwelling on the south side of the Site and an inferred commercial building on the central portion of the Site from 1964 to 2018. According to the review of city directories, the Site was occupied by car rental sale and sale operations between 1976 and 2006 as well as residential between approximately 1955 and 2011. A previous Phase I ESA conducted by Trow Associates Inc. (the former identify of EXP) indicated that the Site was occupied by a Tastee Freeze (1969-1970) and Jack's Pizza (1970-1980). The north portion of the Site is currently rented out for parking and the residence on the south side of the Site has been converted into separate units for student rental housing.

6.2 Potentially Contaminating Activities

Current observations, records and historical information pertaining to the Site and previous assessments were evaluated in relation to on-and off-Site PCAs. Three on-Site PCAs were identified during this Phase One ESA and are shown on Figure 3A, including:

- 28. Gasoline and associated products in fixed tanks (Furnace Oil AST)
- 30. Importation of Fill Material of Unknown Quality
- 52. Storage, maintenance, fueling and repair of equipment, vehicles and material used to maintain transportation systems (Storage of vehicles for rental and sale purposes only)

Four (4) off-Site PCAs were identified in the Phase One Study Area. The off-Site PCAs are shown on Figure 3A and include:

- 28. Gasoline and associated products in fixed tanks (71 Wyndham Street South)
- 34. Metal Fabrication (67 Wyndham Street South)
- 37. Operation of dry-cleaning equipment (77 Wyndham Street South)
- 52. Storage, maintenance, fueling and repair of equipment, vehicles and material used to maintain transportation systems (71-75 Wyndham Street South)
- 54. Textile manufacturing (Guelph Carpet and Worsted Spinning Mills, east of Neeve Street between the Speed River and Howitt Street and Canadian Textile & Weaving Co. Limited, east side of Wyndham Street South, south of Speed River (formerly 30-33 Crawford Street now 67 Wyndham Street South))

6.3 Areas of Potential Environmental Concern

Off-site PCAs distanced enough from the Site and/or cross-gradient in relation to the inferred groundwater flow direction to the north/northwest. Thus, off-Site PCAs are not considered to have contributed to an APEC.

APEC	Location of APEC	Potentially Contaminating Activity (PCA)	Location of PCA (on- or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted
APEC 1	Entire Site	30. Importation of fill material of unknown quality	On-Site	PAHs O. Reg. 153 Metals & Inorganics	Soil
APEC 2	Northern Portion of Site	52. Storage, maintenance, fuelling and repair of equipment, vehicles and material used to maintain transportation systems 54. Textile manufacturing and processing	On and Off-Site	PHCs VOCs	Soil and Groundwater
APEC 3	Eastern Portion of Site	28. Gasoline and associated products in fixed tanks 34. Metal fabrication 37. Operation of dry cleaning equipment 52. Storage, maintenance, fuelling and repair of equipment, vehicles and material used to maintain transportation systems	Off-Site	PHCs VOCs	Soil and Groundwater
APEC 4	Southeast Corner	28. Gasoline and associated products in fixed tanks	On-Site	PHCs	Soil and Groundwater

Based on the Phase One ESA findings, PCAs both on- and off-Site were identified, which may have contributed to an APEC at the Site. EXP recommends that a Phase Two ESA (which includes soil and groundwater sampling) be conducted at the Site.

7. Conclusions and Recommendations

Based on the Phase One ESA findings, PCAs on-Site and off-Site were identified, which may have contributed to an APEC at the Site.

EXP recommends that a Phase Two ESA (which includes soil and groundwater sampling) be conducted at the Site.

Appendices

Appendix A:
Limitation of Liability, Scope of Report, and Third Party Reliance

This report has been prepared and the work referred to in this report has been undertaken by EXP for the City of Waterloo. It is intended for the sole and exclusive use of the City of Guelph. Any use, reliance on or decision made by any person other than the City of Guelph. based on this report is the sole responsibility of such other person. The City of Guelph and EXP make no representation or warranty to any other person with regard to this report and the work referred to in this report and they accept no duty of care to any other person or any liability or responsibility whatsoever for any losses, expenses, damages, fines, penalties, or other harm that may be suffered or incurred by any other person as a result of the use of, reliance on, any decision made or any action taken based on this report or the work referred to in this report.

The investigation undertaken by EXP with respect to this report and any conclusions or recommendations made in this report reflect EXP's judgement based on the Site conditions observed at the time of the Site inspection on the date(s) set out in this report and on information available at the time of preparation of this report. This report has been prepared for specific application to this Site and it is based, in part, upon visual observation of the Site, subsurface investigation at discrete locations and depths, and specific analysis of specific chemical parameters and materials during a specific time interval, all as described in this report. Unless otherwise stated, the findings cannot be extended to previous or future Site conditions, portions of the Site which were unavailable for direct investigation, subsurface locations which were not investigated directly, or chemical parameters, materials or analysis which were not addressed. Substances other than those addressed by the investigation described in this report may exist within the Site, substances addressed by the investigation may exist in areas of the Site not investigated and concentrations of substances addressed which are different than those reported may exist in areas other than the locations from which the samples were taken.

If Site conditions or applicable standards change or if any additional information becomes available at a future date, modifications to the findings, conclusions and recommendations in this report may be necessary.

Other than by the City of Guelph and their authorized designates, copying or distribution of this report or the use of or reliance on the information contained herein, in whole or in part, is not permitted without the express written permission of exp. Nothing in this report is intended to constitute or provide a legal opinion.

METRIC DISTANCES SHOWN ON THIS PLAN ARE IN METRES AND CAN BE CONVERTED TO FEET BY DIVIDING BY 0.3048.

NOTES

BEARINGS ARE UTM GRID, DERIVED FROM OBSERVED REFERENCE POINTS A AND B, BY REAL TIME NETWORK (RTN) OBSERVATIONS, UTM ZONE 17, NAD83 (CSRS) (2010.0).

DISTANCES ARE GROUND AND CAN BE CONVERTED TO GRID BY MULTIPLYING BY THE COMBINED SCALE FACTOR OF 0.999xxx.

FOR BEARING COMPARISONS, A ROTATION OF 0°5'20" COUNTER-CLOCKWISE WAS APPLIED TO BEARINGS ON P1, P2 & P3.

Qualifications of Assessors

Scott Aziz, P.Eng.

Team Leader/Senior Project Manager

*+1.519.963.3000 | scott.aziz@**exp**.com*

Areas of Expertise

- Brownfields, Records of Site Condition
- Phase I & II Environmental Site Assessments
- Remediation and Decommissioning
- Asbestos and Designated Substance Surveys, Abatement Monitoring
- Methane Gas Surveys, Monitoring, Design of Venting Systems

Overview

Mr. Aziz is the Team Leader and Senior Project Manager for the Environmental Division with 25 years of experience in various arenas of the environmental field. His duties include project management of environmental projects including the supervision of over one thousand Phase I and Phase II Environmental Site Assessments and Decommissioning projects on commercial and industrial properties. He possess considerable experience implementing and overseeing environmental management services to a wide variety of industrial, institutional and governmental clients and is familiar with relevant guidelines, acts, and laws as they apply to waste management, regulatory compliance issues, environmental investigations and site decommissioning in the province of Ontario. Mr. Aziz has considerable technical experience in environmental subsurface investigations including underground storage tank (UST) removals and associated soil and groundwater assessment and remediation. Mr. Aziz is fully acquainted with proper sampling protocol and all Environmental Regulations and Guidelines. Scott is a Qualified Person (QP) registered with the Ministry of Environment.

Project Experience

- Portfolio Due Diligence Assessment
  Supervised the completion of Environmental Site Assessments for Portfolio sites across the country for Z Group Development, Hawthorne Retirement, Kingsett Capital, Central Park Lodge and Ontrac Equipment.

- 2 Terrace Street, London - Phase I and II Environmental Site Assessments, Site Remediation of metals, petroleum hydrocarbons and PAH impacted soils, Record of Site Condition, Brownfield Assessment

Professional Registrations

- Association of Professional Engineers of Ontario

Education and Training

- B.Sc. (Chemical Engineering), University of Western Ontario, 1989

Affiliations and Memberships

- Member of Association of Professional Engineers of Ontario

Languages Spoken

- English

Laura joined EXP in February 2011. She holds a degree from Brock University in Biological Sciences, 2008, as well as a post-graduate certificate from Conestoga College in Environmental Engineering Applications, 2009. As Project Manager and Environmental Scientist with the Environmental Division in Cambridge, Ontario, Laura has gained hands on and management experience in many areas. Her expertise includes: Phase I and Phase II environmental assessments, contaminant delineation investigations in soil and groundwater, soil and groundwater remediation/monitoring programs, RSC compliant field protocols/techniques, designated substance surveys, and consulting services for mould and asbestos abatement and management.

Project Experience

Commercial Office/Retail

Mercedes Corporation, St. Jacobs, ON
RSC Compliant Phase One and Phase Two ESAs, soil and groundwater investigations and drafting

Smart Centres, Fergus, ON
Quarterly to semi-annual groundwater quality monitoring of petroleum impacts.

Shoppers Drug Mart, Guelph, ON
Annual groundwater quality monitoring.

Bruce-Grey Catholic District School Board, various locations, ON
Annual asbestos inspections, including the identification of asbestos containing materials and their condition as well as reporting and recommendations of removal, where necessary.

Frederick Mall, Kitchener, ON
Maintenance and long-term groundwater monitoring of Perozone Injection Remediation System

Loblaw Properties Inc., NF
Coordination and technical report writing for large Phase I ESA portfolio.

Tri County Holdings Ltd. c/o White Caps Property Management, Guelph, ON
Phase I and Phase II ESAs, contaminant source identification, remediation and post-remediation monitoring.

Laura Barrett, B.Sc. - *continued*

Project Manager, Environmental Scientist

Education

University of Waterloo, Quantum Nano Building, Waterloo, ON
Mould management in new construction and long-term atmospheric monitoring, indoor air quality sampling and moisture mapping.

Highways + Roads

407 ETR East extension, Whitby, ON
AutoCAD drafting of erosion control measures.

Residential

Stargrande Custom Homes Corp, Markham, ON
RSC Phase One and Phase Two ESAs, drafting, groundwater quality monitoring, groundwater and surface water level monitoring.

Phase I and Phase II ESAs, various locations, ON
Assessments conducted in Cambridge, Kitchener, Waterloo, Brantford, Guelph, Elmira, Stratford, Ingersoll, Sarnia, Owen Sound, Toronto, Markham, and Scarborough.

Hello Laura,

Thank you for your request for confirmation of public information.

I have searched the below noted addresses and I have located the following record:

Inst Number	Context	Address	City	Province	Postal Code	Status
9846352	FS PROPANE CYLR HANDLING FACILITY	75 WYNDHAM ST S	GUELPH	ON	N1E 5R3	EXPIRED
10075470	FS PROPANE CYLR HANDLING FACILITY	71 WYNDHAM ST S	GUELPH	ON	N1E 5R3	EXPIRED

For a further search in our archives, or for copies of documents, please complete our release of public information form found at https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?_mid_=392 and email the completed form to publicinformationservices@tssa.org or through mail along with the appropriate fee. TSSA's fee schedule can be found at: https://www.tssa.org/en/about-tssa/resources/Documents/Public-Information-Fee-Schedule_Jan_2018.pdf. The fee is payable with credit card (Visa or MasterCard) or with a Cheque made payable to TSSA.

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,

Yalini

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Executive Summary

Property Information:

Project Property:	*76 Wyndham Street South RSC Phase One ESA* *76 Wyndham Street South Guelph ON N1E 5R4*
Project No:	*KCH-00252519-A0*

Order Information:

Order No:	*20190402206*
Date Requested:	*April 2, 2019*
Requested by:	*exp Services Inc.*
Report Type:	*RSC Report (Urban)*

Historical/Products:

Aerial Photographs	*Aerials - National Collection - .tiff files*
City Directory Search	*CD - Subject Site plus 250m Radius*
Physical Setting Report (PSR)	*PSR*
Topographic Map	*Ontario Base Map (OBM)*

Fuel Occurrence Type: Vapour Release
Date of Occurrence: 5/2/2007
Fuel Type Involved: Natural Gas
Status Desc: Completed - Causal Analysis(End)
Job Type Desc: Incident/Near-Miss Occurrence (FS)

Map Key	Number of Records	Direction/ Distance (m)	Elev/Diff (m)	Site	DB

Oper. Type Involved:	Construction Site (pipeline strike)
Service Interruptions:	Yes
Property Damage:	Yes
Fuel Life Cycle Stage:	Transmission, Distribution and Transportation
Root Cause:	Root Cause: Equipment/Material/Component:No Procedures:Yes Maintenance:No Design:No Training:Yes Management:Yes Human Factors:Yes
Reported Details:	
Fuel Category:	Gaseous Fuel
Occurrence Type:	Incident
Affiliation:	Industry Stakeholder (Licensee/Registration/Certificate Holder, Facility Owner, etc.)
County Name:	Wellington

Description: Haastown Holdings (Guelph) Incorporated has been fined $8,000 after pleading guilty to one count of discharging a contaminant into the environment contrary to the Environmental Protection Act. In June 2003, while Haastown Holdings was carrying out restoration work at 45 Cross Street in the City of Guelph, local residents complained about sandblasting dust coming from the construction site. The residents said that the dust was causing them discomfort, and were concerned that it was negatively impacting their health. Haastown pleaded guilty to one count of causing or permitting the discharge of a contaminant into the natural environment that was likely to cause an adverse effect, contrary to section 14(1) of the Environmental Protection Act, and was fined $8,000, exclusive of victim fine surcharge.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ***Note:*** *Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory: Provincial AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory: Provincial AGR

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2018

Abandoned Mine Information System: Provincial AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites: Private ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Automobile Wrecking & Supplies: Private AUWR

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Jan 31, 2019

Borehole: Provincial BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2014

Certificates of Approval: Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Commercial Fuel Oil Tanks: Provincial CFOT

List of commercial underground fuel oil tanks made available by the Fuels Safety Program of the Technical Standards & Safety Authority (TSSA). Ontario Regulation 213/01 of the Technical Standards and Safety Act (2000) requires that all underground tanks be registered with the TSSA. Note: the Fuels Safety Division does not register waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of commercial fuel tanks in the province. The TSSA updates information in its system on an ongoing basis; this listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: Feb 28, 2017

Chemical Register: Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2019

Compressed Natural Gas Stations: Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 - Dec 2018

Inventory of Coal Gasification Plants and Coal Tar Sites: Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions: Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Jan 2019

Certificates of Property Use: Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Feb 28, 2019

Drill Hole Database: Provincial DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Oct 2018

Dry Cleaning Facilities: Federal DRYCLEANERS

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2017

Environmental Activity and Sector Registry: Provincial EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Feb 28, 2019

Environmental Registry: Provincial EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Feb 28, 2019

Environmental Compliance Approval: Provincial ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Feb 28, 2019

Environmental Effects Monitoring: Federal EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches: Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Jan 31, 2019

Environmental Issues Inventory System: Federal EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event: Provincial EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

List of TSSA Expired Facilities: Provincial EXP

List of facilities and tanks - for which there was once a registration - no longer registered with the Fuels Safety Program of the Technical Standards and Safety Authority (TSSA). Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc. Tanks which have been removed from the ground are included in the expired facilities inventory held by the TSSA. Notes: the Fuels Safety Division did not register private fuel underground/aboveground storage tanks prior to January of 1990, or furnace oil tanks prior to May 1, 2002; nor does the Division register waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

Government Publication Date: Feb 28, 2017

Federal Convictions: Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land: Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

Government Publication Date: Jun 2000-Oct 2018

Fisheries & Oceans Fuel Tanks: Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2018

Fuel Storage Tank: Provincial FST

List of registered private and retail fuel storage tanks made available by the Fuels Safety Program of the Technical Standards & Safety Authority (TSSA). Ontario Regulation 213/01 of the Technical Standards and Safety Act (2000) requires that all underground tanks be registered with the TSSA. Notes: the Fuels Safety Division did not register private fuel underground/aboveground storage tanks prior to January of 1990, or furnace oil tanks prior to May 1, 2002; nor does the Division register waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of fuel storage tanks/tank facilities in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

Government Publication Date: Feb 28, 2017

Fuel Storage Tank - Historic: Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary: Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Dec 31, 2018

Greenhouse Gas Emissions from Large Facilities: Federal GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2016

TSSA Historic Incidents: Provincial HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks: Federal IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

TSSA Incidents: Provincial INC

List of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC) and made available by the Technical Standards and Safety Authority (TSSA). Under the Technical Standards & Safety Act (2000), the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors, and equipment or appliances that use fuels. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

Government Publication Date: Feb 28, 2017

Landfill Inventory Management Ontario: Provincial LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Sep 30, 2017

Canadian Mine Locations: Private MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Environmental Penalty Annual Report: Provincial MISA PENALTY

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2017

Mineral Occurrences: Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Jan 2018

National Analysis of Trends in Emergencies System (NATES): Federal NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports: Provincial NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2016

National Defense & Canadian Forces Fuel Tanks: Federal NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills: Federal NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites: Federal NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents: Federal NEBI

Locations of pipeline incidents from 2008 to present, made available by the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Sep 30, 2018

National Energy Board Wells: Federal NEBW

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES): Federal NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory: Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory: Federal NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells: Private OGW

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Feb 28, 2019

Ontario Oil and Gas Wells: Provincial OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-May 2018

Inventory of PCB Storage Sites: Provincial OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders: Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Feb 28, 2019

Canadian Pulp and Paper: Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks: Federal PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register: Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: 1988-Sep 2018

TSSA Pipeline Incidents: Provincial PINC

List of pipeline incidents (strikes, leaks, spills) made available by the Technical Standards and Safety Authority (TSSA). Under the Technical Standards & Safety Act (2000), the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors, and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of pipeline incidents in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

Government Publication Date: Feb 28, 2017

Private and Retail Fuel Storage Tanks: Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water: Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Feb 28, 2019

Ontario Regulation 347 Waste Receivers Summary: Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2016

Record of Site Condition: Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.
RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Jan 2019

Retail Fuel Storage Tanks: Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Jan 31, 2019

Scott's Manufacturing Directory: Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills: Provincial SPL

This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Dec 2018

Wastewater Discharger Registration Database: Provincial SRDS

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2016

Anderson's Storage Tanks: Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks: Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970-Aug 2018

TSSA Variances for Abandonment of Underground Storage Tanks: Provincial VAR

List of variances granted for abandoned tanks. Under the Technical Standards and Safety Authority (TSSA) Liquid Fuels Handling Code and Fuel Oil Code, all underground storage tanks must be removed within two years of disuse. If removal of a tank is not feasible, an application may be sought for a variance from this code requirement.
Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of tank variances in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

Government Publication Date: Feb 28, 2017

Waste Disposal Sites - MOE CA Inventory: Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Feb 28, 2019

Waste Disposal Sites - MOE 1991 Historical Approval Inventory: Provincial WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System: Provincial WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Dec 31, 2017

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Appendix J: Interview

exp. *The new identity of Trow Associates*

STANDARD PHASE I ESA QUESTIONNAIRE

Project #:	Date: April 15, 2019
Owner: Michael Flaman	Occupant: Tenants
Address: 76 Wyndham St. South, Guelph Ontario N1E5R4	
Property Description and Size: Double lot; house + paved commercial lot	

1. Has the property or an adjacent property(s) currently or previously been used for an industrial or commercial use? If yes, please specify activities and time frames.

Owner	Occupants	Observed During Site Visit
(Yes) No Unknown	Yes No Unknown	(Yes) No

NOTES:
Rented as a Used Car Sales business & truck rental business. Currently rented for parking only

2. Are there or have there been in the past, any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals in the aggregate, stored on or used at the property or on any of the adjacent properties? If yes, please specify location.

Owner	Occupants	Observed During Site Visit
Yes (No) Unknown	Yes No Unknown	Yes (No)

NOTES:

3. Are there currently, or have there been in the past, any industrial containers of chemicals located on the property or on any of the adjacent properties? If yes, please specify location.

Owner	Occupants	Observed During Site Visit
Yes (No) Unknown	Yes No Unknown	Yes (No)

NOTES:

4. Are you aware or do you have any prior knowledge that fill material has been brought onto the property that originated from an unknown origin or contaminated site? If yes, please specify location.

Owner	Occupants	Observed During Site Visit
(Yes) No Unknown	Yes No Unknown	(Yes) No

NOTES:
We believe there may have been silt used to fill the area 100 years ago.

5. Has the property or any of the adjacent properties been used for the any of the following industries/activities/storage/related activities, either currently or historically (please mark where applicable):

AREA OF CONCERN	YES	NO	COMMENT
Chemicals		X	
Electrical Equipment		X	
Metal Smelting and/or Processing		X	
Mining		X	
Milling		X	
Petroleum and Natural Gas Drilling/Production/Processing/Retailing and/or Distribution (Including Gasoline Station)		X	
Transportation	X		truck rental
Junkyard, waste disposal/landfill/waste treatment and/or Processing, Recycling		X	
Wood, Pulp and Paper Products		X	
Appliance Equipment and/or Engine Repair/Reconditioning/Salvage		X	
Ash Deposit from boilers and/or other Thermal Facilities		X	
Asphalt Tar Manufacturing		X	
Coal Gasification		X	
Medical/Chemical/Radiological and/or Biological Labs		X	
Rifle and/or Pistol Firing Ranges		X	
Road Salt Storage Facilities		X	
Dry Cleaning Facilities		X	
Commercial Printing Facilities and/or Photo Developing Laboratory		X	
Site which have been or are likely to have been contaminated by substances migrating from other properties.		X	

Note: Former coal gas plant at 25 Wydham St. S. (~250m from site)

6. Are there currently, or have there been in the past, any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal? If yes, please specify location.

Owner	Occupants	Observed During Site Visit
Yes (No) Unknown	Yes No Unknown	Yes (No)

NOTES:

7. Is there currently any, or has there been in the past, stained soil on the property? If yes, please specify location.

Owner	Occupants	Observed During Site Visit
Yes (No) Unknown	Yes No Unknown	Yes (No)

NOTES:

8. Are there currently, or have there been in the past, any registered or unregistered storage tanks (above or underground) located on the property? If yes, please specify location.

Owner	Occupants	Observed During Site Visit
Yes (No) Unknown	Yes No Unknown	(Yes) No

NOTES:

↳previous report indicates former AST for heating oil in basement.

9. Are there currently, or have there been in the past, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property? If yes, please specify location.

Owner	Occupants	Observed During Site Visit
Yes (No) Unknown	Yes No Unknown	(Yes) No

NOTES:

↳former AST in basement for heating oil.

10. Is there currently, or have there been in the past, evidence of leaks, spills or staining by substances other than water, or foul odours, associated with any flooring, drains, walls, ceilings, or exposed grounds on the property? If yes, please specify location.

Owner	Occupants	Observed During Site Visit
Yes (No) Unknown	Yes No Unknown	Yes (No)

NOTES:

11a. If the property is served by a private well or non-public water system, is there evidence or do you have prior knowledge that contaminants have been identified in the well or system that exceed guidelines applicable to the water system? If yes, please specify location.

Owner	Occupants	Observed During Site Visit
Yes (No) Unknown	Yes No Unknown	Yes (No)

NOTES:

11b. If the property served by a private well or non-public water system, have there been in the past, any well designated as contaminated by any government environmental/health agency? If yes, please specify location.

Owner	Occupants	Observed During Site Visit
Yes (No) Unknown	Yes No Unknown	Yes (No)

NOTES:

12. Are you aware of any environmental liens or governmental notification relating to past or recurrent violations of environmental laws with respect to the property or any facility located on the property? If yes, please specify.

Owner	Occupants	Observed During Site Visit
Yes (No) Unknown	Yes No Unknown	Yes (No)

NOTES:

13. Are you aware of current or past existence of hazardous substances or petroleum products with respect to the property or any facility located on the property? If yes, please specify.

Owner	Occupants	Observed During Site Visit
Yes (No) Unknown	Yes No Unknown	Yes (No)

NOTES:

14. Are you aware of any current or past existence of environmental violations with respect to the property or any facility located on the property? If yes, please specify.

Owner	Occupants	Observed During Site Visit
Yes (No) Unknown	Yes No Unknown	Yes (No)

NOTES:

15. Are you aware of any environmental site assessment of the property or facility that indicated the presence of hazardous substances or petroleum products on, or contamination of, the property or recommended further assessment of the property? If yes, please specify.

Owner	Occupants	Observed During Site Visit
Yes (No) Unknown	Yes No Unknown	(Yes) No

NOTES:

↳ Previous Phase I ESA recommended further work.

16. Are you aware of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the property? If yes, please specify.

Owner	Occupants	Observed During Site Visit
Yes (No) Unknown	Yes No Unknown	Yes (No)

NOTES:

17a. Does the property discharge wastewater (not including sanitary waste or storm water) onto or adjacent to the property and/or into a storm water system? If yes, please specify.

Owner	Occupants	Observed During Site Visit
Yes (No) Unknown	Yes No Unknown	Yes (No)

NOTES:

17b. Does the property discharge wastewater (not including sanitary waste or storm water) onto or adjacent to the property and/or into a sanitary sewer system? If yes, please specify.

Owner	Occupants	Observed During Site Visit
Yes (No) Unknown	Yes No Unknown	Yes (No)

NOTES:

18. Are you aware of any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or any other waste materials that have been dumped above grade, buried and/or burned on the property? If yes, please specify.

Owner	Occupants	Observed During Site Visit
Yes (No) Unknown	Yes No Unknown	Yes (No)

NOTES:

19. Is there, or has there been in the past, a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs? If yes, please specify.

Owner	Occupants	Observed During Site Visit
Yes (No) Unknown	Yes No Unknown	Yes (No)
