## Executive Summary

The executive summary is a brief synopsis of the report and should not be read in lieu of reading the report in its entirety. JLP Services Inc. (JLP) was retained by BJC Architects + Associates Inc. ("Client") to conduct a Due Diligence Phase I Environmental Site Assessment (ESA) at 81 Royal Road, Guelph, Ontario, herein referred to as the "Site" and "Subject Property".

It is understood that this ESA is required for commercial/industrial redevelopment/site plan purposes. It is further understood that no change in land use is proposed and a Record of Site Condition (RSC) filing, as per Ontario Regulation (O.Reg.) 153/04, is not required at this time.

The objective of the Due Diligence Phase I ESA was to determine if there were any indications of environmental impairment to the Site related to historical and/or current activities that have occurred at the Site or to activities that have occurred at neighbouring properties or adjoining land parcels. The Due Diligence Phase I ESA involved a review of records pertaining to the Site, an inspection of the subject property, interviews with personnel familiar with the Site, and a walk-by inspection of the surrounding properties.

At the time of the assessment, the Site was owned by Brad Ireland. The subject property has been owned by Brad Ireland since 1998.

Based on the records review, interviews and Site reconnaissance, the railroad tracks on-Site and industrial manufacturing directly adjacent, within the study area and in proximity to the Site were considered to pose a potential concern to soil and/or groundwater. Therefore, a Due Diligence Phase II ESA is recommended to assess soil and groundwater quality at the Site.

## 1. Introduction

JLP Services Inc. (JLP) was retained by BJC Architects + Associates Inc. ("Client") to complete a Due Diligence Phase I Environmental Site Assessment (ESA) at the property located at 81 Royal Road in Guelph, Ontario. For the purposes of this report, the terms "Site" and "Subject Property" refer to the property with the municipal address of 81 Royal Road in Guelph, Ontario.

The purpose of this ESA was to assess the actual and/or potential environmental risks associated with the Subject Property. The objective of this assessment is to determine if there are any indications of potential environmental impairment on the property from past, current and/or surrounding land uses that may present potential environmental concerns to the Subject Property.

It is understood that this ESA is required for commercial/industrial redevelopment/site plan purposes. It is further understood that a Record of Site Condition (RSC) is not intended or required for the Subject Property.

JLP performed the Due Diligence Phase I ESA in accordance with Canadian Standards Association (CSA) Z768-01 (R2022) and in accordance with generally accepted professional practices. JLP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended.

JLP's report terms and conditions are outlined in Appendix A. Tables and Figures referenced throughout the report are provided at the beginning of the Appendices section.

### 1.1 Phase I Property Information

Property information for the Site is provided in the table below.

Table 1.1.1 – Property Information

<b>Current Property Owner and Acquisition Year</b>	Brad Ireland Guelph Manufacturing Group Inc. (Ownership since 1998)
<b>Phase I Representative</b>	Brad Ireland Vice President of Engineering & Corporate Development Guelph Manufacturing Group Inc. 39 Royal Road Guelph Ontario N1H 1G2
<b>Municipal Address</b>	81 Royal Road, Guelph, Ontario
<b>Nearest Intersection</b>	Royal Road and Woodlawn Road West (Guelph)
<b>Site Measurements/ Area</b>	Approximately 2.0 hectares (5.0 acres)
<b>Universal Transverse Mercator (UTM) coordinates*</b>	NAD83 17- 4821671N 556434E

\* The UTM coordinates were based on Global Positioning System (GPS) measurements obtained from Google Earth

## 2. Scope of Investigation

The Phase I ESA included a review of historical records pertaining to the Site and surrounding properties, a walk-through inspection of the Site, a walk-by survey of the surrounding properties (publicly accessible areas), and an evaluation of all information collected. Historical sources of information reviewed included archival aerial photographs and selected Ministry of the Environment, Conservation and Parks (MECP) databases and inventories. The documentation review included a search of applicable federal and provincial government and private source databases through Environmental Risk Information Services Ltd. (ERIS). Information for the Site was requested from the Technical Standards and Safety Authority (TSSA), and the MECP Freedom of Information (FOI) office. An online search of the Government of Ontario Environmental Registry, MECP Brownfields Environmental Site Registry, MECP Resource Productivity & Recovery Authority (RPRA) formerly known as the Hazardous Waste Information Network (HWIN), and MECP Well Records Division database was also conducted.

Although JLP made requests for the information available from the operators of these databases, there are inherent limitations and uncertainties in the data provided in that the available data could be an incomplete or inaccurate reflection of historical conditions, and the searches may not have uncovered all available and/or relevant data. Due to the historical and documentary nature of the sources consulted, no verification of the accuracy or completeness of the data was made by JLP, and statements made by others were not verified for accuracy.

In completing the scope of work for the Phase I ESA investigation, JLP did not conduct any intrusive investigations including, but not limited to, sampling, analyses and/or monitoring.

JLP personnel who conducted assessment work for this project included Ms. Cindy Luu, B.Sc., Ms. Morgan Chornoboy, M.E.S., B.Sc. and Mr. Ajay Jayalath, P.Geo., QP.

## 3. Record Review

### 3.1 General

#### 3.1.1 Phase I Study Area Determination

The Phase I Study Area included the surrounding land extending a distance of 250 metres from the centre of the Subject Property. At the time of the Site reconnaissance, land usage within 250 metres of the Site boundaries is commercial and industrial.

#### 3.1.2 First Developed Use Determination

Currently, the Site has been vacant (non developed) for approximately 94 years, dating back to the 1930s. Site information prior to 1930s are unknown.

Historical records used to determine the first developed uses include, but are not limited to, aerial photographs and municipal records.

#### 3.1.3 Fire Insurance Plans

A search of the Catalogue of Canadian Fire Insurance Plans 1875 – 1975 (Catalogue) was conducted by Opta Information Intelligence (Opta) to determine if FIPs for the Site existed. Based on a review of the Catalogue, no FIPs were available for the Site.

The Opta FIP search is provided in Appendix B.

### 3.1.4 Chain of Title

A chain of title search, which would determine the names of the past property owners, is not thought to be particularly useful or necessary to meet the objective of this Phase I investigation and, therefore, was not performed.

### 3.1.5 Environmental Reports

At the time of reporting, no previous environmental reports were provided to JLP for review.

## 3.2 Environmental Source Information

### 3.2.1 Federal and Provincial Database Search

A search of provincial, federal and private environmental databases for records pertaining to the Site and properties within the Phase I Study Area was completed by Environmental Risk Information Services (ERIS) on October 30, 2024. JLP has confirmed neither the completeness nor the accuracy of the records that were provided.

The ERIS database search identified a total of 440 records within the ERIS Study Area of 0.3km, all of which are associated with off-Site locations.

Records for water wells are discussed in Section 3.2.3. and are not listed in the table below. Based on topographic maps, the groundwater flow is estimated to be northerly towards an unnamed tributary/creek. Records for private/municipal sewer/water works and records downgradient (unless adjacent) of the Subject Site and were not considered to be an environmental concern. The ERIS report records are summarized below in Table 3.2.1.

Table 3.2.1 – ERIS Summary

Address (Distance to Site)	Description of PCA	Database	Assessment
Royal Rd and Woodlawn Rd (18m W)	Emco <ul style="list-style-type: none"> <li>30-litre of gasoline and coolant spilled to roadway due to collision.</li> </ul>	SPL	Based on the low volume, this is not anticipated to pose a soil and/or groundwater concern at the Subject Site.

### 3.2.3 Ontario Ministry of the Environment Records

A summary of the databases and findings are summarized in the table below.

Table 3.2.3 – Summary of Ontario Ministry of Environment Records

Database	Date Accessed	Summary
Freedom of Information (FOI) and Protection of Privacy Act	November 20, 2024	Records pertaining to the Site were requested from the MECP through the Freedom of Information (FOI) and Protection of Privacy Act on October 31, 2024. It was determined on November 20, 2024, that no records were available for the Site. FOI details are provided in Appendix E.
Environmental Registry of Ontario website (formally Government of Ontario Environmental Bill of Rights [EBR] registry)	October 30, 2024	No records found within 250m of Site.
Resource Productivity & Recovery Authority (RPRA) - formerly MECP Hazardous Waste Information Network (HWIN)	October 30, 2024	The following records were located within 250m of the Site: <ul style="list-style-type: none"> <li>- 84 Royal Road <ul style="list-style-type: none"> <li>o AEGIS CUSTOM POWDER COATERS DIV OF ETSM TECHNICAL</li> <li>o Waste class: emulsified oils, oil skimmings &amp; sludges, alkaline phosphates</li> </ul> </li> </ul>

Database	Date Accessed	Summary
		<ul style="list-style-type: none"> <li>- 52 Royal Road <ul style="list-style-type: none"> <li>o EnVision Consultants Ltd.</li> <li>o Engineering services</li> <li>o Waste class: halogenated solvents</li> </ul> </li> <li>- 409 Woodlawn Road W <ul style="list-style-type: none"> <li>o Siemens Mobility / GFL Environmental Services Inc.</li> <li>o Motor and generator manufacturing</li> <li>o Waste class: oil skimmings &amp; sludges</li> </ul> </li> <li>- 390 Woodlawn Road W <ul style="list-style-type: none"> <li>o WestRock Guelph</li> <li>o Corrugated and solid fibre box manufacturing</li> <li>o Waste class: waste compressed cases, graphic art wastes, organic laboratory chemicals, waste oils &amp; lubricants, petroleum distillates, paint/pigments/coating residues, acid waste (other metals)</li> </ul> </li> </ul>
MECP Brownfields Environmental Site Registry website	October 30, 2024	At the time of reporting, the Brownfields environmental registry was under review and unavailable to view. Records of Site Condition (RSCs) filed since October 1, 2004, are included in the Access Environment online tool, discussed in the following part.
Access Environment – environmental approvals and registrations	October 30, 2024	<p>The following records were located within 250m of the Site:</p> <ul style="list-style-type: none"> <li>- 390 Woodlawn Road W <ul style="list-style-type: none"> <li>o WestRock Guelph / Smurfit-MBI / MBI Limited</li> <li>o Corrugated material manufacturer</li> <li>o (1) environmental compliance approval (ECA) and (2) certificates of approval (CA) for industrial air emissions</li> <li>o (1) environmental registration of air emissions</li> </ul> </li> <li>- 335 Woodlawn Road W <ul style="list-style-type: none"> <li>o John Crane Canada Inc. / Trelleborg Silcofab</li> <li>o (2) CAs for industrial air emissions</li> </ul> </li> <li>- 350 Woodlawn Road W <ul style="list-style-type: none"> <li>o Guelph Tool Inc.</li> <li>o Metal stamping and welded assemblies (automotive)</li> <li>o (1) CA for industrial air emissions</li> </ul> </li> <li>- 345 Woodlawn Rd W <ul style="list-style-type: none"> <li>o Marble Electronics Inc.</li> <li>o (1) ECA for industrial air emissions</li> </ul> </li> <li>- 348 Woodlawn Road W <ul style="list-style-type: none"> <li>o Sanimax Marketing Ltd.</li> <li>o (1) CA for industrial air emissions</li> </ul> </li> <li>- Lot 1, Con. 5, Div. D, <ul style="list-style-type: none"> <li>o Sacco Well</li> <li>o (5) permits to take water (PTTW) for municipal water supply</li> </ul> </li> <li>- Woodlawn Road <ul style="list-style-type: none"> <li>o (1) PTTW for construction dewatering</li> </ul> </li> <li>- 41 Massey Road <ul style="list-style-type: none"> <li>o Newton Group Ltd.</li> <li>o (1) environmental registration of air emissions</li> </ul> </li> <li>- 147 Massey Road <ul style="list-style-type: none"> <li>o Purolator Courier Ltd.</li> </ul> </li> </ul>

Database	Date Accessed	Summary
		<ul style="list-style-type: none"> <li>○ (1) CA for industrial air emissions</li> <li>- 84 Royal Road</li> <li>○ ETSM Technical Services Ltd.</li> <li>○ Metal coating facility</li> <li>○ (1) ECA for industrial air emissions</li> <li>- 52 Royal Road</li> <li>○ E-Cell Corporation</li> <li>○ (1) CA for industrial air emissions</li> </ul>
MECP Interactive Map “Well Records”	October 30, 2024	<p>Twenty-two (22) well records were located within 250m of the Site:</p> <ul style="list-style-type: none"> <li>- One (1) well for municipal water supply was installed in 1952.</li> <li>- Three (3) wells for observation or monitoring purposes were installed from 2004 to 2017.</li> <li>- Six (6) records for abandoned wells, installed from 2006 to 2019.</li> <li>- Nine (9) test holes, installed in 2010.</li> <li>- One (1) record for a test and monitoring well, installed in 2014.</li> <li>- One (1) record for a municipal well alteration in 2016.</li> <li>- One (1) unspecified or incomplete well in 2018.</li> </ul>

### 3.2.4 Technical Standards and Safety Authority

The Technical Standards and Safety Authority (TSSA) was contacted for records of underground storage tanks (USTs) at the Site and adjacent properties. On October 31, 2024, TSSA informed JLP that there are no fuels records associated with the subject address.

It is to be noted that the Fuels Safety Division did not register private USTs or ASTs prior to January of 1990, or furnace oil tanks prior to May 1, 2002. The Fuels Safety Division also does not register waste oil tanks in apartments, office buildings, residences etc., or aboveground gas or diesel tanks. ASTs and USTs within the study area are listed within the ERIS records, when available.

A copy of the TSSA communications is provided in Appendix F.

## 3.3 Physical Setting Sources

### 3.3.1 Aerial Photographs

Satellite images from 1930, 1955, 1966, 1975, 1981, 1990, 2006, 2015 and 2022 were obtained via ERIS and Google Earth. A summary is provided in Table 3.3.1, below:

Table 3.3.1: Aerial Photographs Summary

Year	Description of the Site	Description of Surrounding Properties
1930-1966	Subject Site is an agricultural field or vacant.	Surrounding area consists of agricultural and/or rural residential properties.

Year	Description of the Site	Description of Surrounding Properties
1975	Subject Site is vacant.	Woodlands and/or rural residential properties to the north and east of the Site. Three large industrial buildings about 70 to 170 metres to the southeast to southwest of the Site. Railroad tracks along the southeast border of the Site.
1981	Three objects onsite. Image is unclear and details cannot be discerned.	More industrial buildings about 70 and 250 metres northeast of the Site. Commercial developments about 100 metres west of the Site.
1990	Subject Site is vacant.	More commercial developments north of the Site, along northside of Woodlawn Rd W.
2006	Subject Site is vacant.	Adjacent industrial building to the northeast of the Site has expanded. More commercial developments north of the Site, along northside of Woodlawn Rd W. Some industrial properties south/southeast of the Site have expanded.
2015-2024 (Google Earth)	Subject Site is vacant.	A branch of railroad tracks has been developed crossing through the southeast corner of the Site, leading to adjacent property. Adjacent industrial building to the northeast of the Site has expanded. More commercial developments north of the Site, along northside of Woodlawn Rd W. Some industrial properties south/southeast of the Site have expanded.

Aerial photos from the 1920s and 1940s were not available.

Based on a review of the aerial photographs and satellite images, agricultural properties were observed near the Site until the 1970s. The industrial properties have been southwest, south and northeast of the Site since the 1970s.

Copies of the aerial photographs are included in Appendix G.

### 3.3.2 Topography, Hydrology and Geology

Table 3.3.2.1 – Summary of Topography, Hydrology and Geology Maps

<b>Physiographic Region (Chapman and Putnam, 1984)</b>	Guelph Drumlin Field
<b>Native Quaternary Soils (Ontario Geological Survey, 2000)</b>	Port Stanley Till – Pleistocene, silt to sandy silt matrix becoming silt to silty clay near Lake Erie, strongly calcareous, moderate to low clast content decreasing southward
<b>Bedrock Geology (Geological Survey of Canada, 2011)</b>	Guelph Formation – Sandstone, shale, dolostone, siltstone
<b>Surficial Geology (Ontario Geological Survey, 2010)</b>	Stone-poor, sandy silt to silty sand-textured till on Paleozoic terrain
<b>Bedrock Depth (Gao et al. and MECP Well Records)</b>	Approximately 5 to 7 metres below grade
<b>Topography (MECP “Make a Topographic Map”)</b>	The topography at the Subject Property and near vicinity is relatively flat, sloping 2m from the southwest border to the northeast border of the Site, towards a tributary of the Speed River. Regionally, the land slopes southeast towards Speed River.

Table 3.3.2.2 – Estimated Groundwater Flow

Site/Soil Characteristics	Description
<i>Localized Horizontal Gradient (estimated)</i>	0.001 m/m
<i>Assumed Hydraulic Gradient (estimated)</i>	0.001 m/m
<i>Water Bearing Soil Type</i>	Silty Sand
<i>Hydraulic Conductivity (estimated)</i>	$10^{-4}$ cm/s
<i>Effective Porosity (estimated)</i>	0.33
<i>Groundwater Flow Velocity (estimated)</i>	9.6 cm/year
<i>Groundwater Flow Direction (estimated)</i>	Northerly

Table 1 summarizes the environmental setting and site-specific characteristics. Table 2 shows Darcy's Law calculations of the estimated groundwater flow velocity at the site.

### 3.3.3 Water Bodies and Areas of Natural Significance

There are no bodies of water present on the Site. There is a tributary to Speed River approximately 170 metres northeast of the Site. The nearest major surface water body to the Site is Speed River, located approximately 3,750 metres to the southeast. The surrounding properties of the Site consist of residential and industrial use.

The biodiversity Explorer on the Ministry of Natural Resources and Forestry (MNRF) lists areas of natural significance including provincial parks, conservation reserves, areas of natural and scientific interest, wetlands, environmentally significant areas, habitats of a threatened or endangered species, and wilderness areas. A review of the MNRF database indicated the Site is not located within 30 metres of any area of natural significance.

## 4. Interviews

An interview was conducted by JLP staff with the individual identified to be the most knowledgeable with respect to both the current and historical site uses. The interview was conducted in order to obtain information to assist in identifying details of potentially contaminating activities, potential contaminant pathways in, on, or below the site, and areas of potential environmental concern. Any information provided during the interviews is presented alongside information from the site reconnaissance in Section 5.

During the completion of this Phase I ESA, the following individual was interviewed:

1. Mr. Brad Ireland, owner of 81 Royal Road, Guelph was interviewed on December 18, 2024.

Mr. Ireland stated that the property is currently owned by himself and has been owned by himself since 1998.

Mr. Ireland was unaware of any fill material, spills, fires, or orders and/or fines charged to the site by municipal, regional and/or provincial agencies. He stated that the site had been used in an agricultural capacity and was a corn field up until the 1980s, and vacant since then.

A site reconnaissance was conducted by JLP staff as part of this Phase I ESA. The findings are summarized in the table below.

Table 5.1 – Site Reconnaissance Summary

GENERAL REQUIREMENTS	
Date and Time	November 22, 2024, between 10:00 AM and 11:00 AM
Conducted by	Ms. Morgan Chornoboy under the supervision of Mr. Ajay Jayalath, P.Geo., QP
Weather during Site Visit	Overcast with a temperature of 7°C.
Photographs	Photographs documenting the site reconnaissance including the photographs included in Appendix H.
SITE DESCRIPTION AND BUILDINGS ON-SITE	
General Site Description	<p>The site is currently vacant with mature trees and a driveway on the southern portion of the property (running from east to west). At the time of the site visit, no buildings, were observed on site. The site is relatively flat. A telecommunications pedestal was noted on the northwestern portion of the site. The entire surface area of the site was grass covered with the exception of the driveway (gravel) located on the southern portion of the site.</p> <p>A small mound of soil (grass covered) between the gravel driveway (southern portion of the property) and the railway tracks were observed.</p>
Buildings	None
Underground Storage Tanks/Above Ground Storage Tanks	No
Unidentified Substances	No
Groundwater Monitoring Wells	No
ADJACENT AND SURROUNDING PROPERTIES	
Land Uses within 250m of the Site Boundaries	<p>North- Industrial</p> <p>East- Industrial</p> <p>South- Industrial</p> <p>West- Commercial/Light Industrial</p>
DESIGNATED SUBSTANCES AND OTHER ISSUES	
Heating and Cooling Systems	None – there were no buildings on-Site
Special Attention Items (outlined by CSA Z768-01 Guidelines)	<p>PCBs - No</p> <p>Asbestos-containing materials (ACM) – No</p> <p>Lead – No</p> <p>Ozone-depleting materials (ODMs) – No</p> <p>Urea foam formaldehyde Insulation (UFFI) – No</p>

	Radon – No
	Mould – No
	Noise and vibrations – No
	Electric and magnetic fields – No
	(due to no buildings on-Site)

## 5. Conclusions

The Site is located at 81 Royal Road in Guelph, Ontario as shown in Figure 1. The Site measures approximately 2.0 hectares (5.0 acres). At the time of the investigation, the Site is vacant.

At the time of the assessment, the Site was owned by Brad Ireland. The subject property has been owned by Brad Ireland since 1998.

Based on the records review, interviews and Site reconnaissance, the railroad tracks and various industrial manufacturing based land uses within the study area and in proximity to the Site were considered to pose a potential concern to soil and/or groundwater. Therefore, a Due Diligence Phase II ESA is recommended to assess the soil and groundwater quality at the Site.

## 6. Closure

We trust this report is satisfactory for your purposes. Should you have any questions, please do not hesitate to contact this office.

Sincerely,

JLP Services Inc.

Cindy Luu, B.Sc.  
Environmental Scientist

Morgan Chornoboy, B.Sc., M.E.S.  
Technical Assistant

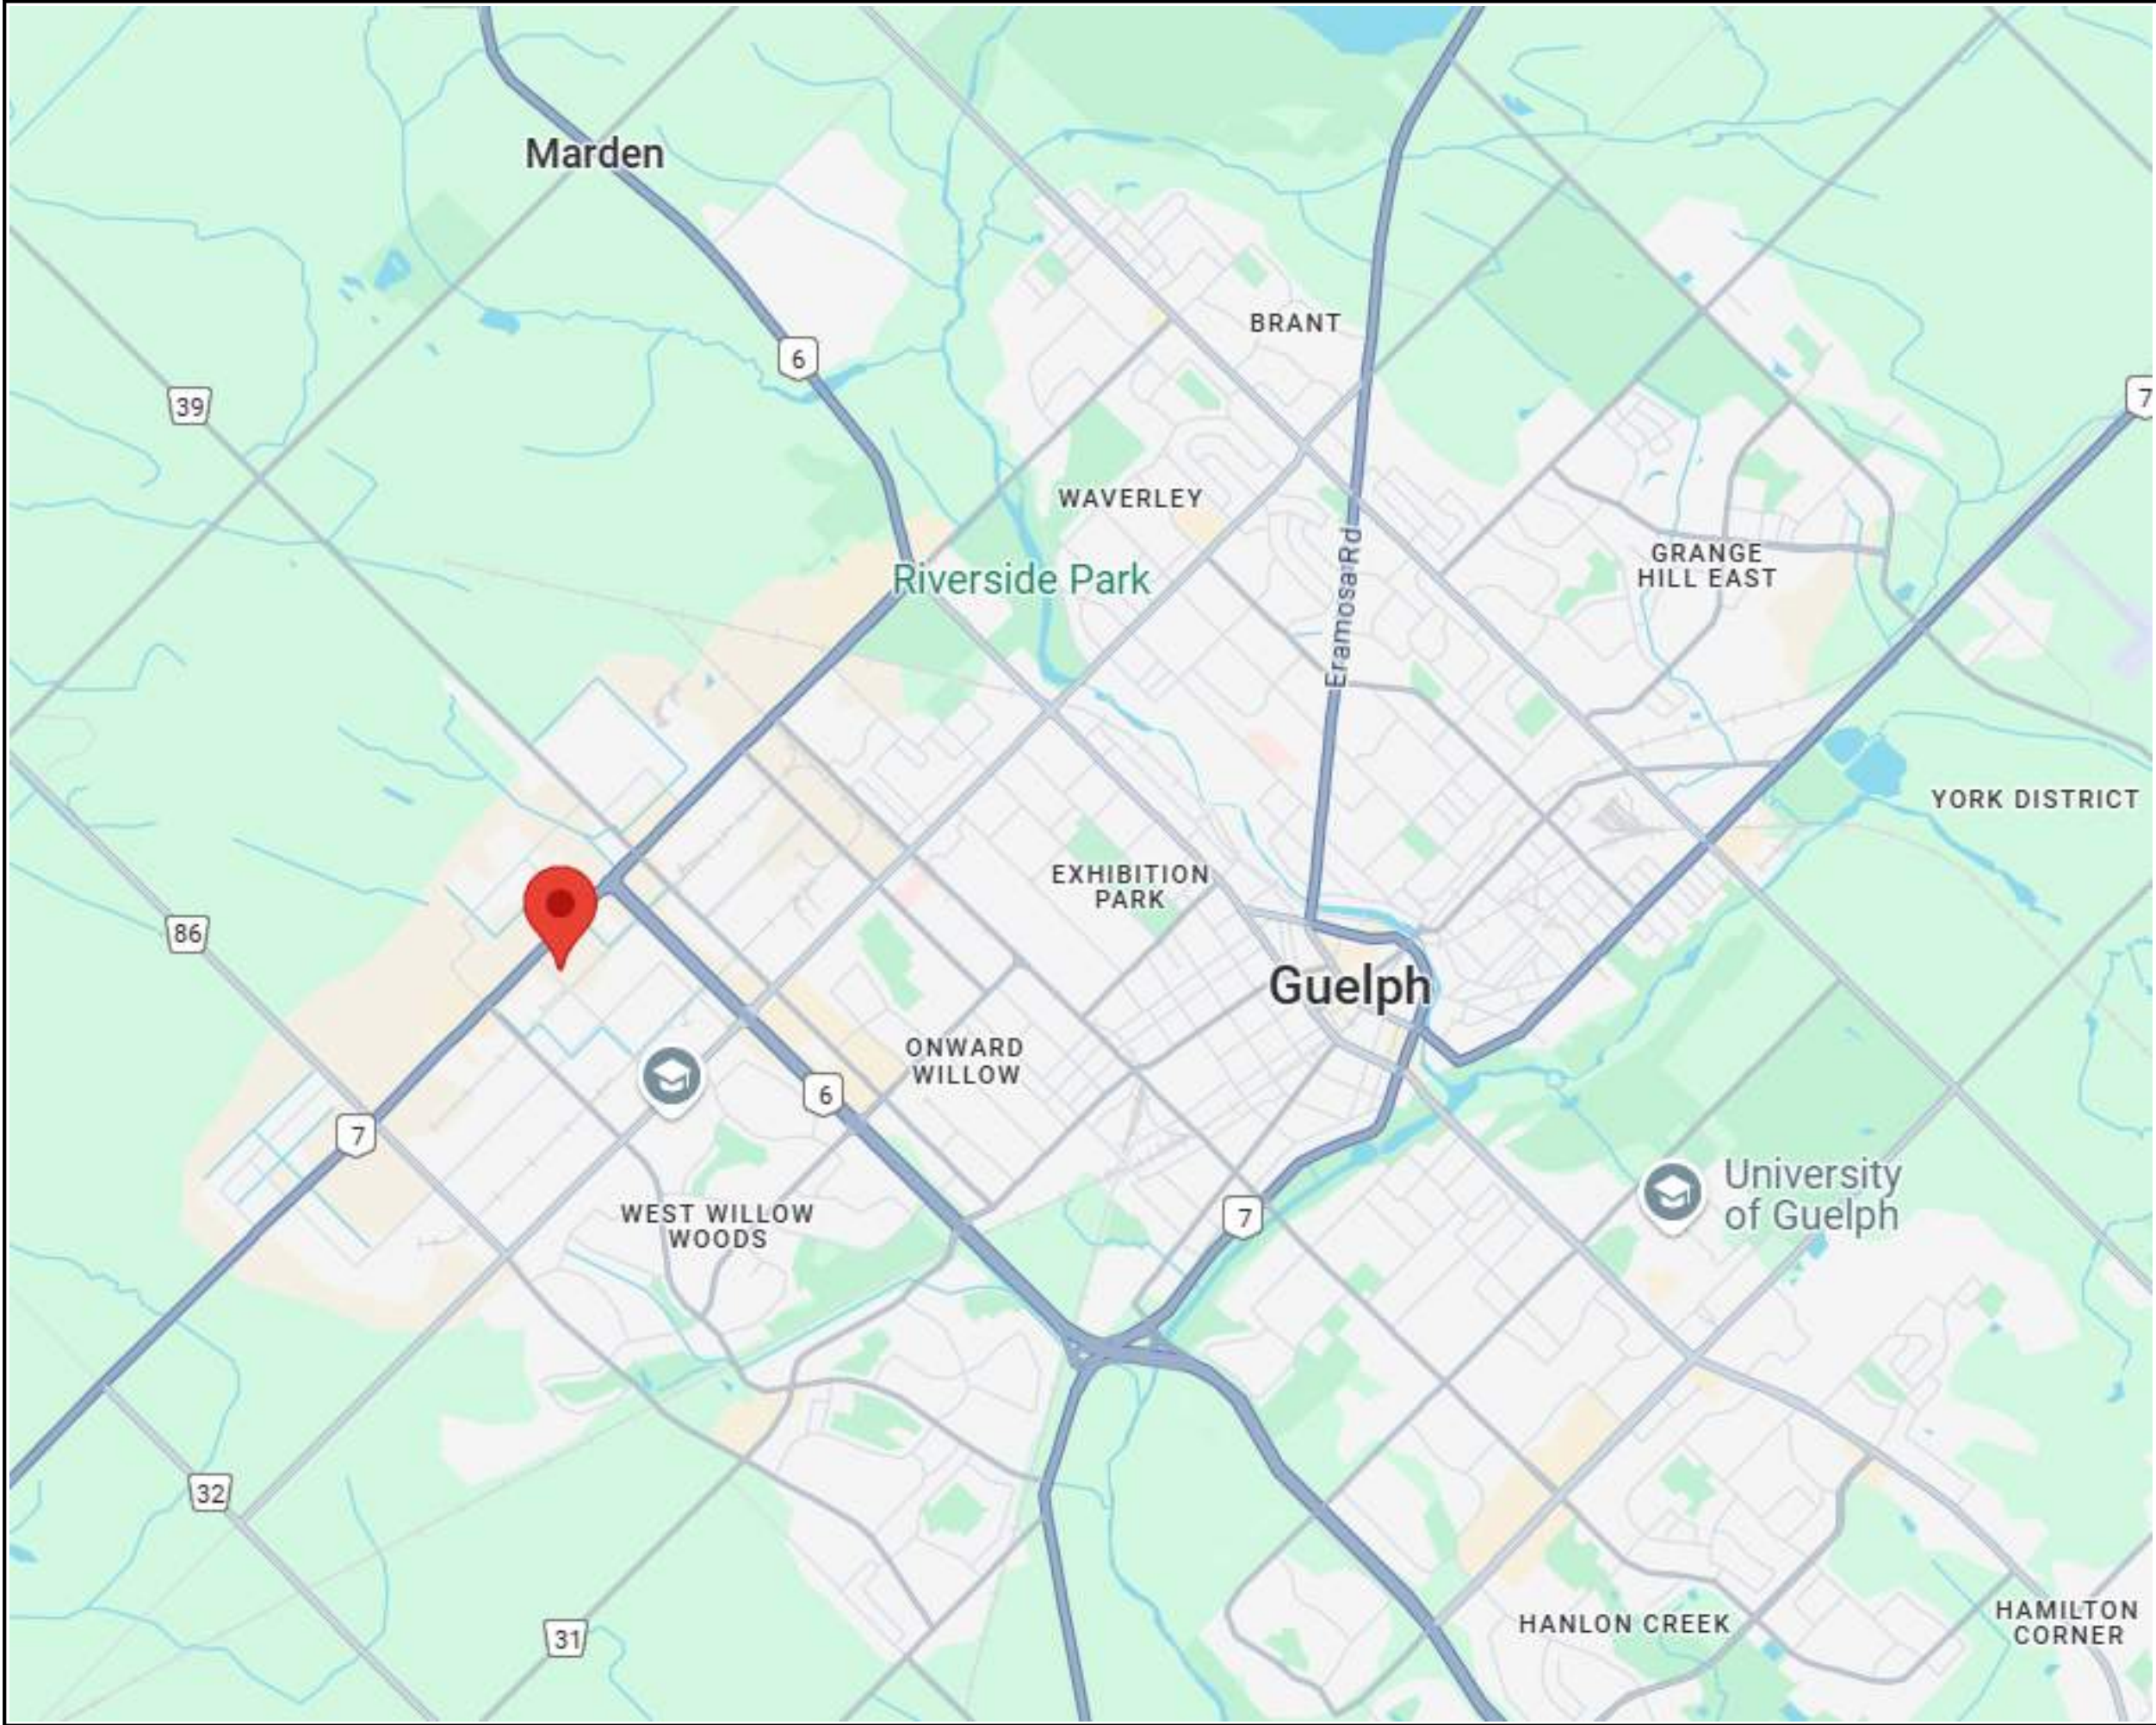

Ajay Jayalath, MBA, P.Geo. QP.  
Vice President, Environmental Services

Distance to Nearest Well (m)	NA
Approximate Depth of Well (m)	NA
Private Sanitary Sewage	NA

### Surface Water

Name of Water Body	Tributary/creek	Speed River
Distance from Site (m)	170	3,750
Elevation drop from site (m)	3	38
Direct Drainage from site	No	No

## Table 2: Darcy's Law Calculations

81 Royal Road, Guelph, ON

T1039-24-9

Formulas: $Q = kiA$ $v = k i/n$ $t = T/v$						
Hydraulic Conductivity k	(m/sec)	=	1.0E-06	Velocity v (m/sec)	=	3.03E-09
	(cm/sec)	=	1.0E-04		(feet/day)	=
Gradient i	(m/m)	=	0.001	(feet/year)	=	3.14E-01
Effective porosity n		=	0.33	(metres/year)	=	0.096
Thickness t	(m)	=	NA	(centimetres/year)	=	9.6
Permeability for silty sand based on published values (Freeze and Cherry, 1979).						
Effective porosity based on published values (McWhorter and Sunada, 1977).						
Gradients estimated based on slope of land.						

## Appendix A – Limitations and Use of Report

## **REPORT TERMS AND CONDITIONS**

**NOTICE: THE FOLLOWING PROVISIONS SET FORTH IMPORTANT QUALIFICATIONS AND LIMITATIONS ON THE FINDINGS AND RECOMMENDATIONS IN THE REPORT AS WELL AS THE USE OF, AND RELIANCE ON, THE REPORT.**

1. **DEFINITIONS.** The following capitalized terms have the following meanings:

- (a) “**Additional Investigations**” means investigations that JLP has indicated to the Client should be undertaken to take into account any Out-of-Scope Requirements, but that are not otherwise specifically within the scope of investigations conducted for the purpose of the Report.
- (b) “**Applicable Laws**” means and includes without limitation all applicable provincial laws, regulations, guidelines, policies, standards, protocols, and objectives administered by the Ministry of the Environment and Climate Change or any other duly-constituted governmental authority, all as in force as of the date of the Report.
- (c) “**Client**” means the Client as referred to in the Report.
- (d) “**Client Information**” means the information, representations, and instructions provided by the Client, the Client’s representatives, and/or others and upon which the Report is based, in whole or in part.
- (e) “**Findings**” means the evaluations and conclusions set forth in the Report.
- (f) “**JLP**” means JLP Services Inc.
- (g) “**Out-of-Scope Requirements**” means special concerns or requirements of the Client in respect of the subject matter of the Report.
- (h) “**Recommendations**” mean the findings and recommendations referred to in the Report, taking into account any Out-of-Scope Requirements that were disclosed to JLP prior to the date of the Report.
- (i) “**Report**” means the report to which these Terms and Conditions are attached and form part.
- (j) “**Report Documents**” means the underlying documents, records, data, and files, in any medium whatsoever, generated in connection with the preparation of the Report, including without limitation, the instructions and objectives communicated to JLP by the Client, communications between JLP and the Client, and other reports, proposals, or documents prepared by JLP for the Client in connection with the Site.
- (k) “**Site**” means the site in respect of which the Report was prepared.
- (l) “**Site Conditions**” means Site conditions known as a result of, or reasonably imputed by, the investigations that were undertaken as of the date of the Report.

2. **BASIS OF REPORT.** The Report is based on the Site Conditions. Any changes to the Site Conditions after the date of the Report that could or will affect the Site Conditions may or will have a corresponding effect on the Recommendations. The Report does not take into account any (a) Additional Investigations that were not undertaken, or (b) Out-of-Scope Requirements that were not communicated prior to completion of the investigations that were been undertaken as of the date of the Report. Where recommended field services are referred to, they are the minimum services necessary to determine compliance of construction with Applicable Laws, generally accepted industry-standard practices, and the Recommendations.

3. **RELIANCE & USE.** The Report has been prepared only for the Site and the related design, development, building, or building assessment objectives identified by the Client. The Findings and Recommendations are based on the Site Conditions and the Client Information. In preparing the Report, JLP has relied upon the Client Information and disclaims any responsibility for any inaccuracy, misstatement, omission, unintentional misrepresentation, or other deficiency contained in the Report as a result of such reliance. Unless specifically stated otherwise, the applicability and reliability of the Findings and the Recommendations expressed in the Report are only valid to the extent that (a) there has been no material change to or variation from any of the Client Information, (b) the Client Information contains no untrue statement of a material fact, or (c) the Client Information omits no statement of a material fact necessary in order to make the Client Information not misleading.

The Report and the Findings and Recommendations are for the sole benefit of the Client. No other party may use or rely upon the Report in whole or in part without the prior written consent of JLP, which may be arbitrarily withheld or conditioned.

RELIANCE UPON THE REPORT OR ANY OF THE DETERMINATIONS MADE HEREIN BY A THIRD PARTY WITHOUT JLP'S CONSENT IS PROHIBITED AND JLP MAKES NO REPRESENTATION, GUARANTEE, OR WARRANTY IN FAVOUR OF ANY THIRD PARTY WITH RESPECT TO THE REPORT WHATSOEVER. JLP FULLY DISCLAIMS, AND WILL HAVE NO LIABILITY FOR, ANY LOSS, DAMAGES, OR EXPENSES WHICH ANY THIRD PARTY MAY INCUR OR SUFFER AS A RESULT OF THE USE OF OR RELIANCE ON THE REPORT WHERE JLP HAS NOT EXPRESSLY AUTHORIZED SAME. ANY THIRD PARTY WHO RELIES ON THE REPORT TO ANY EXTENT DOES SO AT SUCH PARTY'S OWN RISK AND COMPLETELY WAIVES ANY AND ALL CLAIMS AGAINST JLP IN CONNECTION WITH THE REPORT, REGARDLESS OF THE THEORY OF LAW (WHETHER IN CONTRACT, TORT, OR ANY THEORY OF LAW COMING INTO EXISTENCE HEREFTER).

4. **STANDARD OF CARE.** The Report has been prepared in a manner consistent with the degree of care and skill exercised by engineering consultants currently practicing under similar circumstances. No other warranty, expressed or implied, is made or intended in the Report. It is intended that the Findings and Recommendations are meant to assist in reducing the Client's risk associated with environmental impairment at the Site. The Report should not be considered risk mitigation.
5. **ENTIRE REPORT.** The Report also includes the Report Documents. In order to properly understand the Findings and Recommendations, reference must be made to the Report in its entirety. JLP is not responsible for use by any party of a part of the Report only.
6. **GOVERNING FORMAT.** Notwithstanding that JLP may have submitted an electronic version of the Report or any document forming part of the Report, only the signed and sealed physical copy of the Report shall be deemed to be the original and in the event of any dispute or discrepancy, the physical copy shall govern. JLP makes no representation about the compatibility of its electronic or digital file format with the Client's current or future software and/or hardware systems. The documents described herein are JLP's instruments of professional service and shall not be altered without the written consent of JLP.
7. **GENERAL LIMITATIONS.**
- (a) Unless specifically stated otherwise, the Report does not contain environmental consulting advice.
  - (b) The Report contains no opinion or determination as to any matters governed by laws other than the laws of the Province of Ontario and the federal laws of Canada applicable therein as of the date hereof.
  - (c) During any future development of the Site, conditions not observed during JLP's investigations may become apparent. If this occurs, JLP should be contacted to assess the situation and whether there is a need for additional testing.
  - (d) JLP's investigations were carried out to address the intent of Applicable Laws, which are subject to change, and such changes, when coming into legal force and effect, could alter the Findings and Recommendations in a material way.
  - (e) Achieving the objectives stated in the Report has required JLP to arrive at conclusions based upon the best information presently known to JLP. Current investigative methodologies do not completely eliminate the possibility of imprecise or incomplete information. Rather, they merely reduce such possibility to acceptable levels. Professional judgment was exercised in gathering and analyzing information obtained and in the formulation of the Findings. JLP does not act as an absolute insurer of the Findings, and will only be responsible for gross negligence with respect thereto.
  - (f) The Report may not be reproduced in whole or in part by any party other than the Client without JLP's prior written consent. All intellectual property rights in the Report are reserved to JLP

OPTA INFORMATION INTELLIGENCE

## Opta Historical Environmental Services Enviroscan<sup>TM</sup> Terms and Conditions

### Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

### Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

### Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

### Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

### Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

<b>Project Description:</b>		The Forsgeda facility produces silicon-based rubber gaskets, grommets, seals, plugs, and other products for use in the automotive industry. The main process include particulate emissions from the rubber manufacturing, alcohol, xylene, and priming chemicals from the washing of metal inserts, fumes created from the extrusion and press			

Map Key	Number of Records	Direction/ Distance (m)	Elev/Diff (m)	Site	DB
forming of the rubber, and the maintenance of the welding exhausts. Additional air emission sources consist of two (2) indirect-fired make up units, three (3) direct-fired radiant heaters in each plant, plus one (1) indirect-fired radiant heater in the west area of the plant.  <b>Contaminants:</b> <b>Emission Control:</b>

<b>Note:</b>	Substances included on NPRI reports for this NPRI ID are summarized below in the NPRI ID Substances Summary section. Substances listed in the Substances Summary are included on the basis of NPRI ID only. For entities (NPRI ID) with mobile plants and/or more than one facility location, substances listed above may or may not have been reported for specific facilities/mobile locations. The list of substances additionally includes those which have been included on the NPRI report with an unknown quantity or a quantity of 0.

<b>Note:</b>	Substances included on NPRI reports for this NPRI ID are summarized below in the NPRI ID Substances Summary		

Substances included on NPRI reports for this NPRI ID are summarized below in the NPRI ID Substances Summary section. Substances listed in the Substances Summary are included on the basis of NPRI ID only. For entities (NPRI ID) with mobile plants and/or more than one facility location, substances listed above may or may not have been reported for specific facilities/mobile locations. The list of substances additionally includes those which have been included on the NPRI report with an unknown quantity or a quantity of 0.

For specific details about substance quantities, years, release/transfer/disposal methods, the reader is referred the facility report:

<https://pollution-waste.canada.ca/national-release-inventory/?fromYear=1993&toYear=2022&name=7127>

## Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.*

### **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial [AGR](#)

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

**Government Publication Date: Up to Nov 2023**

### **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Apr 2024**

### **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Apr 30, 2024**

### **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2022**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Oct 2023**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Apr 30, 2024**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -May 2024**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Jun 2024**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994 - Aug 31, 2024**

**Drill Hole Database:**

Provincial

[DRL](#)

The Ontario Drill Hole Database (ODHD) is offered by the Province of Ontario's Ministry of Mines. The dataset contains information for over 164,000 percussion, overburden, sonic and diamond-drill holes. The presence of assay results with cutoff values for gold, silver, copper, zinc, lead, nickel and platinum group elements is noted. Drill hole data are compiled from assessment files that have been submitted to the ministry in accordance with the Ontario Mining Act (OMA). Source assessment file numbers are captured for cross reference with the Ontario Assessment File Database (OAFD). Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Aug 2024****Delisted Fuel Tanks:**

Provincial

[DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: Oct 2023****Environmental Activity and Sector Registry:**

Provincial

[EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval). Please see our ECA database.

**Government Publication Date: Oct 2011-Aug 31, 2024****Environmental Registry:**

Provincial

[EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994 - Aug 31, 2024****Environmental Compliance Approval:**

Provincial

[ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011-Aug 31, 2024****Environmental Effects Monitoring:**

Federal

[EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\*****ERIS Historical Searches:**

Private

[EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Aug 31, 2024****Environmental Issues Inventory System:**

Federal

[EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial

EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Apr 30, 2022****Environmental Penalty Annual Report:**

Provincial

EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2023****List of Expired Fuels Safety Facilities:**

Provincial

EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Oct 2023****Federal Convictions:**

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\*****Contaminated Sites on Federal Land:**

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date: Jun 2000-Jun 2024****Fisheries & Oceans Fuel Tanks:**

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2019****Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal

FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: Oct 31, 2021****Fuel Storage Tank:**

Provincial

FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Oct 2023**

**Fuel Storage Tank - Historic:**

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Oct 31, 2022**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO<sub>2</sub> eq).

**Government Publication Date: 2013-Dec 2022**

**TSSA Historic Incidents:**

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: 31 Oct, 2023**

**Landfill Inventory Management Ontario:**

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Mar 31, 2022**

**Canadian Mine Locations:**

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Feb 2024**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2022**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Nov 2023**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Jun 30, 2021**

**National Energy Board Wells:**

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\*****National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\*****National Pollutant Release Inventory 1993-2020:**

Federal

NPR2

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

**Government Publication Date: Sep 2020****National Pollutant Release Inventory - Historic:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

**Government Publication Date: 1993-May 2017****Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-May 31, 2024****Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the Ministry of Natural Resources (MNR) handed over to the Ontario Oil, Gas and Salt Resources (OGSR) Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database includes well owner/operator, location, permit issue date, and well cap date, license number, status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provided for each well record.

**Government Publication Date: 1800-Aug 2024****Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013****Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994 - Aug 31, 2024**

**Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date:** 1999, 2002, 2004, 2005, 2009-2014

**Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date:** 1920-Jan 2005\*

**Pesticide Register:**

Provincial

PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date:** Oct 2011-Aug 31, 2024

**Ontario PFAS Spills:**

Provincial

PFAS

This specific list of spills includes those incidents where one or more of the listed contaminants are identified in the PFAS Structure List and/or PFAS Chemicals Without Explicit Structure List made available by the United States Environmental Protection Agency (US EPA), is originally sourced from the Ministry of the Environment, Conservation and Parks spills related data. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date:** 1988-Mar 2024; May 2024

**NPRI Reporters - PFAS Substances:**

Federal

PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

**Government Publication Date:** Sep 2020

**Potential PFAS Handlers from NPRI:**

Federal

PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

**Government Publication Date:** Sep 2020

**Pipeline Incidents:**

Provincial

PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date:** Feb 28, 2021

**Potential PFAS Handlers from EASR:**

Provincial

PPHA

The Ontario Environmental Activity and Sector Registry (EASR), described in Ontario Regulation 245/11, allows businesses with less complex operations - and hence not requiring an Environmental Compliance Approval - to register their activities with the Ontario Ministry of the Environment, Conservation and Parks (MECP). This list of potential PFAS handlers includes those EASR facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used.

**Government Publication Date:** Jun 30, 2024

**Private and Retail Fuel Storage Tanks:**

Provincial

PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date:** 1989-1996\*

**Permit to Take Water:**

Provincial

PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date:** 1994 - Aug 31, 2024

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial

REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date:** 1986-1990, 1992-2021

**Record of Site Condition:**

Provincial

RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

**Government Publication Date:** 1997-Sept 2001, Oct 2004-Aug 2024

**Retail Fuel Storage Tanks:**

Private

RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date:** 1999-Apr 30, 2024

**Scott's Manufacturing Directory:**

Private

SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date:** 1992-Mar 2011\*

**Ontario Spills:**

Provincial

SPL

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date:** 1988-Jun 2024

**Wastewater Discharger Registration Database:**

Provincial

SRDS

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

**Government Publication Date:** 1990-Dec 31, 2021

**Anderson's Storage Tanks:**

Private

TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date:** 1915-1953\*

**Transport Canada Fuel Storage Tanks:**

Federal

TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date:** 1970 - Apr 2024

**Variances for Abandonment of Underground Storage Tanks:**

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011 Aug 31, 2024**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Dec 31 2023**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

## Appendix D – City Directories

RE: CITY DIRECTORY RESEARCH  
81 Royal Rd  
Guelph, ON N1H 7K3

Thank you for contacting ERIS regarding our City Directory Search services. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. When searching a range of addresses, all civic addresses within that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on highly developed areas, while newly developed areas may be covered in the more recent years, older directories tend to cover only "central" parts of the city. To complete the search, we have either utilized the Toronto Reference Library, Library & Archives Canada and multiple digitized directories. While these do not claim to be a complete collection of all reverse listing city directories produced, ERIS has made every effort to provide accurate and complete information. ERIS shall not be held liable for missing, incomplete, or inaccurate information. If you believe there are additional addresses or streets that require searching, please contact us.

**Search Criteria:**

40-150 of Massey Road

50-90 of Royal Road

330-420 of Woodlawn Road W

**Search Notes:**

## Appendix E – MECP FOI Records

November 20, 2024

Ms. Cindy Luu  
JLP Services Inc.  
405 York Road  
Guelph, Ontario N1E 3H3  
cindy.luu@jlp-services.ca

Dear Cindy Luu:

RE: **MECP FOI A-2024-07124, Your Reference G4936 – Decision Letter**

This letter is in response to your request made pursuant to the Freedom of Information and Protection of Privacy Act (the Act) relating to:

81 Royal Road, Guelph  
Timeframe: January 1st, 1850 to October 30th, 2024

After a thorough search through the ministry files, no records were located responsive to your request. The official responsible for making the access decision on your request is the undersigned. This file is now closed.

You may request a review of my decision within 30 days from the date of this letter by contacting the Information and Privacy Commissioner/Ontario at <http://www.ipc.on.ca>. Please note there may be a fee associated with submitting the appeal.

If you have any questions, please contact Roxanne Chambers at 807-456-3035 or [roxanne.chambers@ontario.ca](mailto:roxanne.chambers@ontario.ca).

Yours truly,

*Roxanne Chambers*

for

Josephine DeSouza  
Manager, Access and Privacy Office

**RE: Preliminary Search Request**

---

**From** Public Information Services <publicinformationsservices@tssa.org>

**Date** Thu 10/31/2024 7:30 AM

**To** Cindy Luu <cindy.luu@jlpsservices.ca>

Hello ,

**NO RECORDS FOUND IN CURRENT DATABASE:**

- We confirm that there are NO **fuels records** in our database at the subject address(es).

This is not a confirmation that there are no records in the archives. For a further search in our archives, please go to the [TSSA Client Portal](https://tssa.org) to complete an Application for Release of Public Information.

Please refer to [How to Submit a Public Information Request \(tssa.org\)](https://tssa.org) for instructions.

The associated fee must be paid via credit card (Visa or MasterCard).

Once all steps have been successfully completed you will receive your payment receipt via email.

## Appendix I – Qualification of Assessors

## **Morgan Chornoboy, B.Sc., MES**

Morgan has a Bachelor of Science in Biology, specializing in Ecosystem Health from the University of Western Ontario. She then obtained a Master's of Environmental Science at the University of Guelph. Afterwards she completed a graduate certificate program in Ecosystem Restoration at Niagara College.

Morgan is responsible for Phase I and II Environmental Site Assessments, due diligence reports, and environmental sampling.

## **Cindy Luu, B.Sc.**

Cindy has a Bachelor of Science in Biomedical Sciences from the University of Waterloo. She then completed a graduate certificate program in Environmental Engineering Applications from Conestoga College.

Cindy is responsible for environmental reporting, including Phase I and II Environmental Site Assessments, due diligence reports, excess soil management, environmental monitoring and investigations, regulatory compliance and regulations.

## **Ajay Jayalath, MBA, M.Sc., P.Geo., QP**

Mr. Jayalath graduated from University of Toronto with a Bachelor of Science in Environmental Geoscience, specializing in Urban Geoscience and Hydrogeology. He then obtained a Master's of Science degree from the University of Toronto in Environmental Science and a MBA from the DeGroote School of Business, McMaster University.

Mr. Jayalath has over fifteen years of environmental investigations experience in the geo-environmental field. Mr. Jayalath has worked on numerous remediation projects including the design and application of in-situ and ex-situ remediation projects. In addition, he has been involved in over fifty Phase I and II Environmental Site Assessments, from conducting field work to the reporting and project management phases.

His current responsibilities include the management of the environmental groups, including the site assessment, hydrogeological, air quality, hazardous materials, and risk assessment teams. As part of his responsibilities, Mr. Jayalath's role is to ensure the environmental operations are completed in a timely manner to client satisfaction. Mr. Jayalath oversees various contracts for nationwide clients and routinely coordinates with the regional offices to ensure project and contract performance.
