Dear Lindsay,

Irvin Heritage Inc. was retained to conduct further Stage 2 Archaeological Assessment Survey in support of the Guelph Innovation District. The Stage 2 Archaeological Assessment Survey has been completed, with two archaeological sites now being recommended for further Stage 3 Archaeological Assessment.

A partial clearance is being requested from the Archaeology Program Unit, Ministry of Citizenship and Multiculturalism. This request is to allow for earthworks to commence within the property while observing buffer zones around archaeological sites still pending further investigation. The proponent, Fusion Homes, agrees to all protective measures as required by the province for this request.

The archaeological studies involved the field participation of representatives from the Mississaugas of the Credit First Nation, Six Nations of the Grand River and the Haudenosaunee Development Institute. The Stage 2 Archaeological Assessment reports and associated Supplemental Documents have been provided for comments.

The recommended Stage 3 Archaeological Assessments are planned to be completed in 2026.

If you have any questions please don't hesitate to reach out.
