Cedarvale Avenue Park Phase 1 Community Engagement Results January 2018			
Concept Plan Votes:	Concept A	Concept B	Staff Response
Number of votes	44	63	
Percentage	41%	59%	Use Concept B as base for final plan.
Comment	Frequency		Staff Response
I like Concept A because:			
Combined junior and senior play areas	7		Not possible to combine play areas and retain Concept B trail layout which many liked. Removed planting bed between play areas for sightlines and movement. Added seating between play areas with good view to both.
Swings	4		Staff investigated various swing types for preferred concept but areas are too narrow for required safety zones. Other motion type play equipment will be considered at detailed design stage. There are swings elsewhere in neighbourhood.
Fitness stations	3		In preferred plan
Shelter over seating	1		In preferred plan
More flat grass	1		Moved fitness station out of flat grass area.
Seat wall	1		In preferred plan
Has more senior play equipment	1		Amount of equipment increased in preferred plan.
I dislike Concept A because:			
Not enough shade	1		Trees and shelter in preferred plan
I like Concept B because:			
Natural play equipment	8		In preferred plan
Park layout	7		In preferred plan

Separate junior and senior play areas	5	In preferred plan
Trails	4	In preferred plan
Natural feel	3	In preferred plan
Game table	3	In preferred plan
Shade, trees	3	In preferred plan
Fitness stations	3	In preferred plan
Sand play	4	In preferred plan
Shade structure	2	In preferred plan
Seat wall	2	In preferred plan
Benches	1	In preferred plan
Bike rack	1	In preferred plan
I dislike Concept B because:		
Sand play	3	Provided because more residents liked this than disliked it. Size of sand play area reduced and junior play area increased. Special sand will be provided to deter animals.
Natural play equipment	2	Will consider some manufactured equipment at detailed design stage.
Doesn't have as much play equipment	1	Increased junior play area size and amount of equipment in play areas.
Add these components:		
Splash pad	8	Infeasible in this park due to slopes, park size, cost.
More benches	7	Added two more benches.
More garbage receptacles	7	Added a garbage receptacle at shelter
Junior and Senior play areas close/visible from one another	7	Not possible to combine play areas and retain Concept B trail layout. Made design changes to address concern.
Shelter over seating	4	Shelter over games table and bench in preferred plan.
Picnic table	3	Not added due to limited space and budget. Added another seat to games table which can be used as a picnic table.
Basketball	3	Not added due to limited space and budget. Very expensive due to slopes. There are courts elsewhere in neighbourhood.
Shade sail over both play areas	1	Not added due to cost. Play areas are narrow so trees will shade them well.

Another games table	1	Not added due to budget and space limitations. Seat walls can be used as informal tables.
Narrower trails	1	Will consider at detailed design stage.
Educational signage	1	Not added due to budget and space limitations, other items in demand.
Pollinator friendly plantings	1	Will consider at detailed design stage.
Natural retaining wall material	1	Will consider at detailed design stage.
Dog waste bin	1	Not a service provided in Guelph.
Community garden	1	Not added due to space limitations, other items in demand.
Washroom	1	Not an item provided in neighbourhood parks.
Off Street Parking	1	Not permitted by zoning by-law for neighbourhood park zone (P2).
One park sign instead of two	1	There is one park identification sign and two trail signs which are a legislated requirement.
Ice rink	1	Not added due to space limitations, very expensive due to slopes and no water line in park.
Avoid these components:		
Fitness stations	2	Provided because more residents liked these than disliked them.
Add this play equipment:		
Swings	6	Not added due to insufficient space in preferred concept. Will consider motion type play equipment at detailed design stage.
Manufactured equipment	2	Will consider at detailed design stage.
Make retaining wall into climbing wall	1	Retaining walls are too close to roadway to use as play equipment.
Water pump	1	Not added because very expensive - no water line in park.
Logs within sand area	1	Will consider at detailed design stage.
More equipment	2	Will consider at detailed design stage.
Zip line	1	Will consider at detailed design stage.
Accessible equipment	1	Will provide accessible items.
Rubberized play area surfacing	1	Not added due to budget. Play area surfacing will be engineered wood fibre.

Avoid this play equipment:		
Sand play area	2	Provided because more residents liked this than disliked it. Size of sand play area reduced and junior play area increased. Special sand will be provided to deter animals.
Sand play equipment surfacing	4	Play area surfacing will be engineered wood fibre.
Natural play equipment	3	Provided because more residents liked these than disliked them. Will consider different natural play equipment than W. C. Winegard P.S. and some manufactured equipment.
