The City of Guelph (City) is undertaking a Class Environmental Assessment (EA) study to investigate opportunities for improvements to Niska Road from the City limits to Downey Road. Segments of the roadway and the bridge over the Speed River are nearing the end of their useful life and require a solution to address their deterioration and increasing maintenance costs. In addition to reviewing several alternative solutions for the road, improvements to the Downey Road intersection, impacts to the environment and community road safety issues, a range of alternative bridge solutions have been examined including but not limited to bridge closure, rehabilitation or replacement. For more information about this study, please visit: <http://guelph.ca/living/construction-projects/niska-road-improvements/>

1. My interest is: (please check all that apply)

2. Comments/Questions/Suggestions (additional space on back of page):

The City of Guelph and R.J. Burnside & Associates Limited thank you for your involvement in the Municipal Class Environmental Assessment for the Niska Road Improvements. Personal information on this form is collected pursuant to the Planning Act, R.S.O. 1990, c. P.13, the Municipal Act, 2001, S.O. 2001, c.25 and will be used for future contact in City of Guelph in meeting the requirements of the *Environmental Assessment Act*. With the exception of personal information, all comments will become part of the public record and published with the final Environmental Study Report.
