

Notice of Public Open House

Victoria Road and Stone Road Schedule C Municipal Class Environmental Assessment

The study

Guelph is one of the fastest growing communities in Canada. Based on recommendations in the 2022 Transportation Master Plan and the Guelph Innovation District Secondary Plan, several key roads in Guelph need upgrades to support new neighbourhoods planned in the Guelph Innovation District.

To plan these updates, the City initiated a Municipal Class Environmental Assessment (EA) study for Victoria Road South, from south of York Road to Stone Road; and for Stone Road East, from Victoria Road South to Watson Parkway South. This study area is shown in Figure 1. The Victoria Road and Stone Road EA will recommend a preferred solution and preliminary design for improvements to Stone Road East, including bridge Structure 117 (located just north of McQuillan's Bridge), and Victoria Road South, including bridge Structure 115 (located south of Florence Lane). These improvements will address the need for road widening to accommodate capacity needs, transit service, and pedestrian and cycling infrastructure.

The process

The Victoria Road and Stone Road study is being completed as a **Schedule C** project in accordance with the Municipal Class Environmental Assessment (October 2000, amended in 2024), which is approved under the Ontario Environmental Assessment Act. This study will address requirements of Phases 3 and 4 of the EA process as Phases 1 and 2 were addressed by the Transportation Master Plan.
